Alderman La Spata inquired about the SMART Program and asked what it does with CDOT. Grant Davis, Director of Grants Management, replied this funding is used to develop an app for your phone that

will allow blind and low vision pedestrians to safely navigate across intersections, so it basically gives them audible and viral tactile responses on their phone to tell them when the walk signal is there.

Alderman La Spata continued, asking how this works because it feels like it's related to the settlement of the suit related to crosswalk accessibility. Director Davis responded that it's related but it's not necessarily something that will solve that issue. This is an app that goes on the phone to help with APS issues but now will not address the issues of the settlement that we have. Alderman La Spata proceeded to ask how does the app tell you if the crosswalk is accessible? Director Davis explained that it will be developed, and it will talk with smart signals, there are approximately 450 smart signals in the city, it will communicate with the signal and use geolocation data on your phone to tell you when the signal says walk. Alderman La Spata requested more information through the chair, thanked Chairman Ervin then concluded. The Chair acknowledge Alderman Reilly who asked if the app developer had been identified or will that be something we are requesting proposals for. Director Davis informed the Alderman that the app developer has not been identified and that they are currently working through the procurement process. Alderman Reilly continued asking if this is a Federal or State Grant? Director Davis informed the Alderman that it is a federal grant. Alderman Reilly replied, ok, thanked the Chairman then concluded.
