Exhibit "A".

Agreement For Sale.

This Agreement is made on or as of the ____ day of _____, 1992 by and between the City of Chicago, a municipal corporation (hereinafter "City") having its office at City Hall, 121 North LaSalle Street, Chicago, Illinois 60602, and Robert Hughes, Sr. (hereinafter "Purchaser"), 7000 South South Chicago Avenue, Chicago, Illinois 60637.

Witnesseth:

Whereas, The City obtained an order of demolition dated December 17, 1984, authorizing it to demolish the premises commonly known as 855 East 63rd Street, Chicago, Illinois and legally described as follows (hereinafter "Property"):

a parcel of land comprised of all of Lot 3, and of Lot 4, except the west 12.00 feet of the north 103.25 feet of said Lot 4; also all of each of Lots 17 through 21, including those portions of said lots heretofore dedicated for alleys, but now vacated; also that part of vacated alley, 16 feet wide, lying south of and adjoining the south line of said Lots 3 and 4, and lying north of and adjoining the north line of said Lots 17, 18 and 19, and lying between a straight line which extends southwardly from the southeast corner of said Lot 3 to the northeast corner of said Lot 19, and a straight line which extends southwestwardly from the southwest corner of said Lot 4 to a point on the north line of said Lot 17 which is 22.76 feet, measured along said north line, east from the northwest corner of said Lot 17, all in Block 1 in Snow and Dickinson's Subdivision of Blocks 1, 2 and 3 in William Hale Thompson's Addition to Chicago in the northwest quarter of Section 23, Township 38 North, Range 14, East of the Third Principal Meridian; and comprised also of that part of vacated East 63rd Place, being a strip of land 5 feet wide lying south of and adjoining the south line of said Lots 17 and 18 and of Lots 19, 20 and 21, and the west line extended south of said Lot 17, all in Block 1 aforesaid in Cook County, Illinois.

Property Index Number: 20-23-101-036

; and

Whereas, The structure on the Property has become imminently hazardous and the City desires to proceed expeditiously to demolish the structure; and

Whereas, Purchaser is willing to provide funds to the City to accomplish the demolition in exchange for the City's agreement to quitclaim the Property to Purchaser should the City come into title by foreclosure of a demolition lien or otherwise, or to refund the funds provided by Purchaser, with interest, if the City does not come into title; and

Whereas, The City has placed the Property out for demolition bids and the lowest responsible bidder is Action Wrecking Company;

Now, Therefore, In consideration of the promises and mutual obligations of the parties hereto, each of them covenants and agrees with the other as follows:

1. The City shall enter into a demolition contract with the lowest bidder, for a total amount not to exceed \$43,000.00 to demolish the structure.

2. Purchaser shall pay to the City the sum of \$45,000.00 payable as follows: (A) \$25,000.00 by certified or registered check payable to the City of Chicago, upon execution of this Agreement, which shall be retained by the City or repaid to Purchaser as provided below; and (B) if the City comes into title to the Property by its lien foreclosure action or in any other manner, an additional \$20,000.00 by certified or registered check payable to the City of Chicago upon the City's transfer of title to the Property by quitclaim deed to Purchaser, such sum representing the \$18,000.00 due and owing for the demolition plus Purchaser's \$2,000.00 bid for the Property.

3. Promptly upon completion of the demolition, the City shall file affidavits of costs, including attorneys fees, and promptly petition the court to authorize a demolition lien for the costs of the demolition.

4. The City shall either pursue a foreclosure action through the pending court case entitled *City v. The Woodlawn Organization, et al.*, or file a foreclosure action after 30 days have passed from the entry of the order referenced in Paragraph 3 and shall diligently pursue this foreclosure action in court to obtain title to the Property through a non-cash bid at the foreclosure sale.

5. If the City obtains title to the Property through its foreclosure action or by accepting a deed in lieu of foreclosure for demolition costs or in any other manner whatsoever, the City shall grant, within 30 days of coming into title, and Purchaser shall accept, subject to the provisions of Paragraphs 6, 11 and 12, a quitclaim deed for the Property issued in the name of Purchaser. If Purchaser refuses to accept said quitclaim deed, except for reasons specifically set forth elsewhere in this Agreement, then Purchaser's deposit of \$25,000.00 will be forfeited to the City.

6. The provisions of Paragraph 5 are expressly contingent upon the City either (i) being the successful bidder at the sheriff's foreclosure sale and the court's approval of said sale, (ii) obtaining title to the Property by accepting a deed in lieu of foreclosure, or (iii) obtaining title in any other manner whatsoever. Should the City be outbid at the sheriff's sale, the City shall request that the sheriff disburse to the City from the proceeds of the sale the sum shown in the foreclosure decree as the City's demolition costs plus other costs of the demolition and foreclosure actions, including interest. The City shall reimburse Purchaser his deposit of \$25,000.00

plus interest of 4% per annum (to be calculated from the date Purchaser advances the funds to the City as provided in Paragraph 2 of this Agreement) within 10 days from the date the City receives payment from the sheriff.

7. If the City is the successful bidder at the sheriff's sale, Purchaser shall, at all times on and after the date the sheriff's sale is confirmed by order of court, maintain the Property free from junk and debris and secure it against unauthorized entry. From the date the City obtains title to the Property until such time as title vests with Purchaser, Purchaser shall hold the City harmless from any and all damage and liability claims connected with the Property. Purchaser shall indemnify and hold harmless the City from and against any losses, costs, damages and expenses arising out of and in connection with any accident on the Property causing injury to any person or property from the date that the City obtains title to the Property. All of the provisions of this Paragraph 7 shall begin from the date Purchaser receives actual notice that the City has obtained title to the Property and shall end if the City fails to deliver a quitclaim deed for the Property to Purchaser within 30 days of the date the City obtains title to the Property.

8. The City makes no covenant, representation or warranty as to the environmental condition of the Property or the suitability of the Property for any purpose whatsoever. It shall be the responsibility of Purchaser, at his sole cost and expense, to investigate and determine the soil and environmental condition of the Property. Purchaser agrees to deliver to the City a copy of each report prepared by Purchaser regarding the soil and environmental condition of the Property. If, after the Property has been conveyed to Purchaser, the soil and environmental condition of the Property is not in all respects entirely suitable for the use or uses to which the Property shall be utilized, it shall be the sole responsibility and obligation of Purchaser to take such action as may be necessary to place the soil and environmental condition of the Property in a condition entirely suitable for the intended uses of the Property. Purchaser additionally agrees to indemnify the City from any claim relating to the soil and environmental condition of the Property, and to undertake and discharge all liabilities of the City arising from any condition which existed on the Property prior to the conveyance.

9. Purchaser warrants and represents that neither he nor his agents are acting on behalf of any owner, occupant or party who has an interest in or is responsible for the payment of any lien or any delinquent taxes on the Property prior to the signing of this Agreement. Purchaser represents that he has no interest whatsoever in the Property and further warrants and represents that no benefit shall accrue by virtue of this Agreement to any party, other than Purchaser, who has an interest in the Property prior to the conveyance to Purchaser.

10. Purchaser shall not sell, convey or assign his interest under this Agreement without the prior written approval of the City. Purchaser will be able to freely transfer his interest in the Property upon obtaining a quitclaim deed from the City.

11. The City agrees, if it comes into title as provided in Paragraph 5 of this Agreement, to undertake all appropriate actions pursuant to Ill. Rev. Stat. (1991), Ch. 120, Par. 697e, to abate any due and unpaid property taxes encumbering the Property prior to its conveyance to Purchaser. However, Purchaser agrees to take title subject to those property taxes which are not yet delinquent as of the date of conveyance, and understands that the City cannot and does not guarantee the abatement of said taxes by the County. Notwithstanding the aforesaid, the City will, upon Purchaser's written request, exercise its best efforts to assist him in pursuing the abatement of property taxes against the Property attributable to the time period prior to the conveyance to Purchaser but not yet delinquent as of the date of the conveyance. Additionally, the City agrees to release any and all City liens on the Property, including but not limited to water liens. Purchaser agrees that the City is not responsible for obtaining title insurance or for clearing any title objections other than the above mentioned due and unpaid property taxes and City liens; provided, however, that, excepting those objections concerning property taxes not yet due and unpaid, or those due to or caused by Purchaser, Purchaser shall not be obligated to accept a quitclaim deed for the Property if there are other title objections or remaining liens which cannot be waived or insured by a title insurance company. Demand shall be made by Purchaser by sending a written notice to that effect by registered mail to the Building Commissioner, Department of Buildings, 121 North LaSalle Street, Room 900, Chicago, Illinois 60602. The Building Commissioner shall have 30 days from the date of demand to convey the Property to Purchaser or to reimburse Purchaser his deposit of \$25,000.00 plus interest of 4% per annum (to be calculated from the date of Purchaser's advance of the funds to the City) to the date of demand. The date of demand shall mean the written date the demand is registered with the United States Post Office. Purchaser shall not be deemed to have waived his right to demand under this paragraph by failing to demand at the expiration of the 18 month term stipulated under this paragraph.

13. If at any time prior to the expiration of the 18 month period referenced in Paragraph 12, the City learns or determines that it will not be able to convey the Property to Purchaser, it shall promptly repay to Purchaser his deposit of \$25,000.00 plus interest of 4% per annum (to be calculated from the date of Purchaser's advance of funds to the City).

WHEREAS, the importance of providing an efficient licensing system which minimizes the amount of time that business owners must devote to licensing matters cannot be underestimated; and

WHEREAS, the Department of Revenue has consulted over an extended period with representatives of the business community and various city departments and agencies in an effort to identify and eliminate frequently mentioned problems and inefficiencies involved in the licensing process; and

WHEREAS, providing a system whereby licensees who operate a business or occupation with more than one license may renew all applicable licenses at one time, rather than coming to City Hall on several occasions during the course of a year, will provide a better business environment in the City of Chicago and will encourage efficiency in the city licensing and inspectional process; and

WHEREAS, the elimination or modification of certain archaic or outmoded provisions in the licensing code, and the clarification of other provisions, will promote the essential goals of making the code clear and accessible to the public;

WHEREAS, the City of Chicago is a home rule unit of government as defined in Article VII, Section 6 (a) of the Illinois Constitution, and as such may exercise any power and perform any function pertaining to its government and affairs; and

WHEREAS, the Chicago Health Department is now the delegate regulatory agency of the Illinois Department of Health for certain purposes, all public and private natatoriums are licensed by the state, and the city natatorium license should therefore be rescinded; and

WHEREAS, reorganization of Title 4 of the Municipal Code to reflect by category the types of businesses affected by various code provisions will ensure a more rational and coherent arrangement of the Code, and will assist affected businesses, municipal law practitioners and the average citizen; and

WHEREAS, the implementation of a system of uniform, effective fines for violations of license code provisions will promote compliance with the Code and will serve to effectuate the

important public health and safety features of the Code; and

WHEREAS, the use of consolidated and omnibus license types will reduce the number of licenses that business people in the city of Chicago will be required to obtain and thereby contribute to a better business environment; and

WHEREAS, the elimination of certain licenses for activities which are subject to state regulation, and the deletion of certain outmoded licenses, will contribute to economies in the city's budget, will more rationally reflect the city's contemporary economy, and will avoid duplicative regulation of various businesses.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF CHICAGO.

SECTION 1.

Title 4 of the Municipal Code of Chicago is hereby amended by adding the language underscored, and deleting the language in brackets, as follows:

4-4-010 License-Required-Violation-Penalty.

It shall be unlawful for any person (which refers to, for purposes of this Title, any individual, partnership, corporation, firm, cooperative, association, trust, joint venture, or other entity which conducts, engages in, maintains, operates, carries on or manages a business or occupation within the city of Chicago) to conduct, engage in, maintain, operate, carry on, or manage a business or occupation for which a license is required by any provision of this code, including Section 4-4-020 of this chapter without a license first having been procured for such business or occupation. Any person violating this section shall be fined not less than \$200.00 [\$20.00] nor more than [\$200.00] \$500.00 for each offense, and every day such violation continues shall constitute a separate and distinct offense. In addition, any person who continues to violate this section after notification of such violation may be punished as committing a misdemeanor by incarceration in the county jail for a term not to exceed six months under the procedures set forth in Section 1-2-1.1 of the Illinois Municipal Code and under the provisions of the Illinois Code of Criminal Procedure.

Any business or occupation for which a license is required under Section 4-4-020 of this chapter or any other provision of this code, and to which no license to operate for the period in question has been issued[,] may be closed by the director of revenue until such license is procured[.]. The failure to make any required partial payment or to renew a license shall also constitute grounds for closing by the director of revenue, provided that [except that if the license not procured is a renewal license and the prior license for such business or

occupation had terminated less than one year prior to any issuance of a notice of violation,] the director of revenue shall be required to issue a 30-day notice of violation before the closure may take place.

4-4-020 License-Required for businesses and occupations not provided for by other code provisions.

All persons who conduct, engage in, maintain, operate, carry on, or manage a business or occupation for which a license is not required under any other provision of this code, other than those businesses or occupations which are exempt from city licensing pursuant to law, shall be required to register with the department of revenue of the city and obtain a [general] limited business license for such business or occupation. The license fee for said license shall be as set forth in Section 4-5-010 [\$34.00 per calendar year.] All such businesses or occupations licensed hereunder or under any other provision of this code shall provide the following information to the department of revenue: (1) the names of the owners (excepting stockholders who own less than 25 percent of the voting shares), general partners and officers of the business or occupation, where applicable; (2) the addresses of all offices of such business or occupation located within the city; (3) a [brief] detailed and comprehensive description of such business or occupation; (4) notification of any bankruptcy proceedings instituted by the business or occupation; (5) whether or not the business was purchased as a bulk sale; and [(5)] (6) any other information as may be required by the director of revenue for the protection of the public health, safety or welfare of the patrons of such businesses or occupations, their employees and the general public. Any person who obtains a limited business license shall limit the activities carried on in such business or occupation to those identified in the license application. If the licensee intends to add activities not identified in the application, he or she shall inform the Department of Revenue License Division prior to commencing such activities; said licensee shall also apply for any new license or licenses as may be appropriate.

4-4-021 Renewal of licenses.

Every person who conducts a business or occupation for which a license is required shall renew such license or licenses annually based upon the zip code area in which the business or occupation is located. Licensees located in Area 1 shall renew licenses on or before February 15th of each year. Licensees located in Area 2 shall renew licenses on or before May 15th of each year. Licensees located in Area 3 shall renew licenses on or before August 15th of each year. Licensees located in Area 4 shall renew licenses on or before November 15th of each year. Zip code license areas are as follows:

Area 1 - 60603; 60604; 60609; 60610; 60614; 60618; 60630; 60638; 60639; 60644; 60648; 60649; 60650; 60653; 60655; 60659;

Area 3 - 60602; 60607; 60616; 60617; 60620; 60627; 60631; 60635; 60636; 60637; 60640; 60641; 60647; 60660.

Area 4 - 60601; 60606; 60612; 60619; 60621; 60622; 60625; 60629; 60634; 60642; 60645; 60646; 60651; 60652; 60658.

Licensees who conduct a business or occupation in a zip code area not referred to in this section shall renew their licenses at a time designated by the Director of Revenue. Any license expiring on or after January 1, 1993 shall remain in effect in 1993 until the time prescribed for renewal under this section. Licensees who renew their licenses in 1993, and whose licenses remain in effect for a period of time in excess of the period of time prescribed by this Title, shall pay on a pro rata basis an amount to cover the excess period. All license fees paid in 1993 shall be based upon the fee amounts effective in 1993. The Director may issue rules or regulations to effectuate the purposes of this section. This section shall not apply to licenses for retail liquor dealers.

4-4-022 Installment Plan. Any person whose total license fee payments to the City of Chicago for the renewal of one or more licenses exceeds \$1,000.00 per year may make such payments in installments. The Director of Revenue shall promulgate rules or regulations to effectuate the purpose of this section. The installment plan shall not be available for any retail liquor license fee payments.

4-4-023 License Review Advisory Group. The Director of Revenue may convene, at his discretion, a License Review Advisory Group for the purpose of recommending amendments to, repeal of, or adoption of new provisions relating to licensing of any businesses in the city of Chicago. Such a group shall be comprised of representatives of city departments and agencies and business constituencies that would be affected by the proposed change in law, as well as interested aldermen.

4-4-025 Omnibus Licenses. Except where otherwise provided, when any person obtains a license designated as omnibus, he or she shall indicate in the appropriate place on the Department of Revenue application form the types of activities that will be carried out under the license. If the licensee subsequently intends to carry out additional permitted activities under the omnibus license, he or she shall so inform the Department of Revenue License Division prior to the commencement of such additional activities. For purposes of this title, an omnibus license refers to any license in which two or more distinct licenses created by this title are combined, merged or otherwise co-existent. Where no omnibus license applies, any applicant applying for a primary business establishment license may obtain a general omnibus license to cover both a primary activity and a limited business license for retail sales of general merchandise secondary to the primary activity. For purposes of this title, a primary license refers to a license for activity which constitutes at least fifty one percent of the gross receipts of a business.

Omnibus Licenses shall not change or modify the existing requirements that apply to licenses issued under this title. The purpose of this chapter is to reduce the number of licenses that certain licensees doing business in the City of Chicago must obtain. The purpose of this chapter is not to eliminate any existing regulatory requirements with respect to any licenses that remain in this title.

Any person violating this section shall be fined not less than \$100 for each offense. Every day that any violation of this section shall continue shall constitute a separate and distinct offense.

4-4-030 License-Grant.

In all cases where licenses are required to be procured, such licenses shall be granted by the mayor and attested by the city clerk, except where provision is expressly made for the granting of licenses by some other officer of the city.

4-4-040 License-Issuance.

All licenses, authorized to be issued and required to be procured by any provision of this code, which are granted by the mayor, shall be issued by the city clerk, except where otherwise specifically provided, upon instruction or direction from the mayor so to do.

All such licenses so issued shall bear the seal of the city, the name of the licensee, address, nature or kind of business or occupation licensed, amount of fee paid, and such other material information as the mayor and city clerk shall prescribe. All licenses shall be subject to the provisions of this code which may be in force at the time of the issuance thereof or which may subsequently be passed by the city council.

4-4-050 License-Application.

All applications for licenses of any character whatsoever, except those licenses specifically excepted, shall be made in writing to the director of revenue on a form provided for that purpose.

Every application for a license shall contain the name of the person desiring the same and the place of business of such applicant. If the applicant is a partnership or firm, the application shall contain the names and residence addresses of each of its members; if a limited partnership, the names and residence addresses of each general partner thereof; and if a corporation, the application shall contain the names and residences of its principal officers. In addition to such statements, there shall be set forth in said application the location of the place of business, or proposed location thereof, for which the license is sought, and such other information as may be required by the director of revenue in conformity with the provisions of this code prescribing the requirements of such license.

Except as otherwise specifically provided, when provision is

made for the division of any license year into periods and the issuance of a license for any such period is provided for, a new application for the purpose of renewing such license need not be made in such case by the beginning of each succeeding period unless required by the director of revenue or the head of a department charged with enforcement of a provision of this code under which the license is issued.

The director of revenue shall be the custodian of all applications for licenses which, under the provisions of this code, are required to be made to him.

4-4-060 License--Application--Inspection or investigation.

Upon receipt of an application for a license which requires an investigation or an inspection by any department or board of the city, pursuant to the licensing requirements for the particular license as set forth in the relevant sections of the code governing the particular license, or as to the proper location or condition of the premises in which the business, for which a license is applied, is to be managed, conducted, operated, or carried on, the director of revenue shall transmit to each department or board charged with the investigation and approval of any such application such information as may be necessary in order that the required investigation or inspection may be made. Each department head or president of a board charged with such investigation or inspection shall, immediately upon receipt of such information from the director of revenue, cause an investigation or inspection to be made, and shall, within ten days after the receipt of said information from the director of revenue, determine that the applicant has complied or has not complied with the relevant requirements for the particular license and shall notify the director of revenue accordingly. Within two business days, the director of revenue shall transmit the application and reports of the investigations and inspections to the mayor, with a recommendation that the application be approved or denied.

If any department head or president of a board shall disapprove such application and the applicant for license shall be in business or shall have engaged in the occupation for which a license is sought, it shall be the duty of such department head or president of a board to take such action as shall be necessary to compel compliance with the provisions of this code.

Upon receipt of the report and recommendation of the director of revenue, the mayor shall have the right to examine, or cause to be examined under oath, any applicant for a license or for a renewal thereof, and to examine or cause to be examined the books and records of any applicant. Such examination shall be commenced within 15 days after receipt of the report and recommendation of the director of revenue, and concluded within 30 days thereafter; provided, however, that the mayor may extend the period of such investigation for an additional 15 days to allow completion of the investigation, if necessary. The mayor shall give the applicant written notice of the extension, stating

the reasons therefor. If the applicant fails to appear to answer any question or to produce the books and records said conduct shall be sufficient grounds for denial of the license application. The mayor may authorize a hearing examiner to act on his behalf for the purpose of obtaining any of the desired information.

If the mayor determines that no such examination is necessary, and that the applicant or each of the principal officers, if the applicant is a corporation, has complied with all of the necessary licensing requirements for the particular license and that all laws and provisions of this code regulating the business or occupation for which such license is applied for, have been complied with, the mayor shall immediately authorize the issue of the said license by the city clerk.

If the mayor disapproves the license application, he shall notify the unsuccessful applicant in writing, of the reasons for the disapproval. [4-8-430] 4-276-430 Weighmaster weighing own commodities.

Nothing contained in this chapter shall be construed to prevent any person engaged in the business of selling any commodity which is ordinarily delivered by vehicle, from becoming a public weighmaster under Chapter 4-336 and appointing deputy weighmasters to weigh the commodity being sold and delivered by such person; and any weight certificate issued by such person, or the deputies appointed by him covering commodities sold by such person, shall be of the same effect as the weight certificate issued by any other public weighmaster.

Any person violating any of the provisions of this section shall be fined not less than \$25.00 nor more than \$200.00 for each such offense. The penalty provided herein shall be in addition to any penalty that may be imposed under Sections 4-336-060 and 4-336-070; provided that whenever the reweighing is done on a scale other than the scale on which the weighing was originally done, a variance of one percent or less in the net weight of a load lot between the net weight as set forth in the certificate and the net weight as ascertained by reweighing such load shall not be considered a violation of this section.

Any person in charge of the conveyance or delivering of any commodity who shall have in his possession, or who shall deliver any false or fraudulent certificate of weight or delivery ticket or any said ticket or certificate which is not the result of an actual weighing, shall be fined not less than \$50.00 nor more than \$200.00 for each offense.

The commissioner of the city of Chicago department of consumer services shall write and adopt appropriate rules and regulations pertaining to the safety of operation and conditions appropriate to the exterior and general usage of private ambulances. Such regulations shall include but shall not be limited to the size of lettering and identifying information displayed on the ambulance, or the volume, frequency ranges, and use of sirens. The department of consumer services shall inspect all private ambulances for conformity to these rules and regulations. When the department of consumer services finds a violation of any requirements of this code or of its regulations adopted pursuant, it may make a second inspection after a lapse of whatever time it deems necessary for the correction of the violation. Provided, however, that whenever an inspection indicates that conditions create an imminent hazard to the public, the certificate of inspection for any vehicle may be immediately suspended.

After receipt from the department of consumer services of a notice of violation by the licensee, as evidenced by said inspection report, but before the allotted time has elapsed for compliance, the licensee may request a hearing at the offices of the department of consumer services to file exceptions to the inspection report or may request an extension of the time allowed for compliance. Such appeal must be filed within three days (excluding Saturdays, Sundays, and holidays) of the receipt of such notice of violation.

If, upon such second inspection, it is found that the licensee is in continued violation of this chapter, the certificate of inspection may be temporarily suspended by the department of consumer services.

Upon suspension of the certificate of inspection the sticker shall be removed from the vehicle and delivered to the department of revenue.

The Chicago Police Department shall be notified of the suspension of the license and shall enforce the cessation of operation of the ambulance.

The holder may, at any time, make application for a restoration of the certificate of inspection. After receipt by the department of consumer services of such application, accompanied by a statement signed by the licensee indicating that

the provision or provisions previously violated have been complied with, a reinspection shall be made on the next regular city of Chicago government business day to assure the department of consumer services that the applicant is complying with requirements of this chapter. When the reinspection indicates full compliance, the certificate of inspection shall be restored, and the Chicago Police Department so notified.

Upon a record of repeated violations of this chapter, or repeated suspensions of certificates of inspection, the department of consumer services may recommend the revocation of the ambulance operating license in accordance with the requirements of this chapter.

The city of Chicago board of health, with the advice and consultation of appropriate emergency medical service committees, shall write and adopt health-related rules and regulations regarding private and public ambulance requirements. Regarding basic life support services, these rules and regulations will cover, but not be limited to, proper sanitation, minimal equipment list, the protocol for standard operating procedures, adequacy of the ambulance premises, and other requirements, such as display of ambulance attendants' identification cards while on duty. The city of Chicago department of health shall initially inspect private ambulances seeking licensure for conformity to city of Chicago board of health rules and regulations and make recommendations to the department of revenue regarding approval or disapproval of licensure, and shall inspect licensed ambulances for conformity to city of Chicago board of health rules and regulations.

When the department of health finds a violation of any requirements of this code, or of its regulations adopted pursuant, it may make a second inspection after a lapse of whatever time it deems necessary for the correction of the violation. Provided, however, that whenever an inspection indicates that conditions create an imminent hazard to the public health, the ambulance certificate of inspection may be immediately suspended.

After receipt from the department of health of a notice of violation by the licensee, as evidenced by said inspection report, but before the allotted time has elapsed for compliance, the licensee may request a hearing at the offices of the department of health to file exceptions to the inspection report or may request an extension of the time allowed for compliance. Such appeal must be filed within three days (excluding Saturdays, Sundays, and holidays) of the receipt of such notice of violation.

If, upon such second inspection, it is found that the licensee is in continued violation of this chapter, the

certificate of inspection may be temporarily suspended by the department of health. Upon suspension of the license, the sticker shall be removed from the vehicle and delivered to the department of revenue.

The Chicago Police Department shall be notified of the suspension of the certificate of inspection and shall enforce the cessation of operation of the ambulance.

The holder may, at any time, make application for a restoration of the certificate of inspection. After receipt by the department of health of such application, accompanied by a statement signed by the licensee indicating that the provision or provisions previously violated have been complied with, a reinspection shall be made on the next regular city of Chicago government business day to assure the department of health that the applicant is complying with requirements of this chapter. When the reinspection indicates full compliance, the certificate of inspection shall be restored, and the Chicago Police Department so notified.

Upon a record of repeated violations of this chapter, or repeated suspensions of certificates of inspection, the board of health may recommend the revocation of the ambulance operating license in accordance with the requirements of this chapter.

Nothing in this section shall preclude the initiation of any court action based on any violations of this code.

Any change of ownership of a licensed company shall terminate the ambulance operating license and shall require a new application and a new license, and conformance with all the requirements of this chapter as upon original licensing.

Application for transfer of any ambulance certificate of inspection to another or substitute vehicle shall require conformance with all the requirements of this chapter as upon original licensing. [4-12-070] 4-68-070 Exemption from certain traffic laws.

In response to an emergency call, or while transporting a patient in situations where reasonable grounds exist to believe that an emergency situation is present, ambulance attendants may park irrespective of the otherwise applicable provisions of law, ordinance or regulations, proceed past a red or stop signal or stop sign, but only after slowing down or stopping as may be necessary for safe operation. as set forth in this chapter.

[4-92-110] 4-104-110 Permit-Required.

It shall be the duty of every person licensed under this chapter, intending to generate or release hydrocyanic acid gas or other dangerous gases or fumes for fumigation purposes, before starting such generation or release, to file written notice with the commissioner of buildings, giving the location of the building or enclosed space to be fumigated, and to secure from the commissioner of buildings a permit, which shall state the day and hour when the work will be performed. Each application for such permit shall be accompanied by a fee of \$2.00. Such permit shall be kept on the premises to be fumigated. The time of the permit may be extended if the applicant is unable to perform the work on the hour and day set forth in the permit, and so notifies the commissioner of buildings 16 hours prior to the time set forth in the permit.

Provided that every fumigation of plants, factories, warehouses, box cars, vehicles, specially constructed vaults or any other place where candy or other foodstuffs are manufactured, sold, stored, transported or handled shall be done in strict compliance with the rules and regulations of the board of health, and further provided, that a permit for each such fumigation shall be obtained by the fumigator from the department of health.

Provided, however, that a ship or vessel may be fumigated without previously securing from the commissioner of buildings a permit so to do, if every person, except the watchman, shall leave the vessel for the period of fumigation and the vessel shall be fended off from shore so that no person may board the vessel without the knowledge of the watchman; and provided, further, that where furniture is removed from places of domestic habitation and fumigated in specially constructed vaults, and where furs or clothing are fumigated in specially constructed vaults, the permit for each such fumigation shall not be required, but in lieu thereof, an annual permit shall be secured from the commissioner of buildings after he has investigated and satisfied himself that the proper safeguards for health and life are provided.

[4-92-120] 4-104-120 Notice-Required.

(a) Notice Required. No person shall prevent or arrest the development of fungoid growths, disinfect premises or exterminate vermin by means of lethal, toxic, corrosive, flammable or explosive fumes or gases without first notifying the division marshal in charge of the bureau of fire prevention. Such notice shall be delivered to the division marshal not less than 24 hours before any such fumigation process is begun. Such notice shall include the description and address of the premises to be fumigated, the names and addresses of the occupant and owner of said premises and the name and address of the person in charge of such fumigation operations. Such notice shall also state the name and character of the fumigating agent to be employed and the exact time and duration of such process.

[4-92-130] 4-104-130 Notification of occupants-Vacating of premises.

When hydrocyanic gas or other dangerous gases or fumes are used for exterminating purposes, before fumigation, the operator shall personally inspect the premises and shall serve notice, over his signature, upon all responsible occupants of each room or apartment within the danger area, stating the danger of the process and the precautions to be observed, designating the rooms or apartments which must be vacated and indicating the time when the gas is to be generated or liberated. The form of this notice shall be approved by the department of health. Every room in the danger area shall be vacated. In the case of a building in which there is an inner court, vent shaft or light well or a lot line court with a party wall or in the case of two buildings having adjacent lot line courts, upon which any room being gassed opens, every room with windows or other apertures opening to such inner or lot line courts, vent shafts or light wells shall be vacated and securely locked. Where the walls of any adjoining buildings are located within 10 feet of the rooms or apartments being gassed, the operator shall notify, over his signature, all responsible occupants of rooms or apartments with window openings in such walls that such windows as are directly opposite or above the area of the adjoining building which is under gas, must remain closed or the rooms vacated during the time the building gassed is being flushed or aired. All rooms or apartments ordered vacated, but not under gas, shall be well-ventilated during the process by keeping the windows of the rooms or apartments open.

Provided, however, that such vacation of premises and notification of occupants shall not be necessary where the fumigation is done in special rooms or vaults in furniture stores, secondhand stores or household goods warehouses or vaults in candy and other food processing plants, when such special rooms or vaults are approved as to their location, construction and gastightness by the department of health, and a provision is made for the airing of such vaults so as to allow the escape of gases at such a location where it is not dangerous by a system of ducts and ventilation approved by the department of health.

The danger area is that portion of any structure or dwelling which lies within the boundary of the outside walls of the building under gas, the roof and the basement or cellar floor, and such cut-off or fire walls as may exist in the structure in question. Such cut-off or fire walls shall be of solid masonry, gastight, at least eight inches in thickness extending from the basement through the attic, with all openings locked and guarded against entry and effectively sealed against gas leakage.

This vacating is essential and shall be adhered to in all cases except where it is necessary to keep boilers in operation to maintain temperatures in certain rooms in plants (particularly food processing plants). These boiler rooms may be allowed to remain in operation during the fumigation period provided they are sealed gastight from the remainder of the building, and that all doors or other openings leading from the boiler rooms to the part of the

plant under gas are locked and barricaded, and further provided no one be permitted to enter the boiler rooms except in company with one of the fumigators who is to remain with him while he is in these rooms. Furthermore such persons and the fumigators shall wear suitable gas masks while in the boiler rooms.

[4-92-140] 4-104-140 Crew removal from vessels.

No vessel shall be fumigated until the captain or other commanding officer shall have mustered the crew and caused the members thereof and all other persons therein or thereon to leave and remain away from such vessel during the process of fumigation. Provided, however, that where a part of a vessel is to be fumigated and such part is not occupied or immediately adjoining an occupied portion of the vessel, and where after an investigation conducted by the commissioner of buildings, it appears that such portion may be fumigated without danger to life or health, he may, in his discretion, grant permission to the holder of a permit to perform fumigation without requiring all persons in other parts of such vessel to leave the same, subject to such conditions and restrictions as he may impose.

[4-92-150] 4-104-150 Sealing of rooms.

Before fumigating with hydrocyanic acid gas or other dangerous gases or fumes, the operator shall securely seal all cracks, holes, crevices, openings and apertures in walls, ceilings and floors in such a way as to confine the gas to the premises intended to be fumigated.

[4-92-160] 4-104-160 Locking rooms and apartments.

Before fumigation, the operator shall personally inspect all rooms and apartments ordered vacated under Section 4-92-130, and be assured that they are unoccupied by persons or domestic animals, after which all doors to all rooms or apartments, excepting one exit door to the rooms or apartments to be gassed, shall be securely locked; in addition, such windows or other wall openings as might possibly be used to gain entrance shall be locked or barred in such a way as to prevent entrance while still permitting thorough airing of the room. Immediately upon generating or liberating the gas, the door through which the operator leaves shall be securely locked and sealed, and all keys obtainable to all rooms or apartments ordered vacated shall be retained by the operator until all danger is passed. As an additional precaution, all rooms and apartments vacated shall be placarded.

[4-92-170] 4-104-170 Warning card.

Prior to releasing the hydrocyanic gas or other dangerous gases, suitable warning signs shall be posted on all entrances or doors to the premises to be fumigated, and upon all gangplanks, ladders and other approaches, etc., from the deck, pier or land to the vessel as follows:

DANGER

Skull Fumigating with Skull
and Cyanide Gas and
Crossbones Deadly Poison Crossbones

All persons are warned to keep away.
By Order of the Department of Health.
(Name and address of licensee as well as telephone number).

Such sign shall be printed in red ink on white cardboard. The letters in the word "Danger" shall be at least two inches high, all others except the signature at least three-fourths of an inch high. At night and in places where the natural light between sunrise and sunset is dim, such signs shall be illuminated so as to make the reading matter thereon plainly legible.

[4-92-180] 4-104-180 Safety measures-Exceptions.

(a) Safety Measures. Before the beginning of any fumigation process, referred to in Section 4-92-120, all automatic electrical devices shall be removed from service and all fires and open flames shall be extinguished. The premises shall be adequately sealed to prevent escape of the fumigating agent into occupied quarters. Warning placards shall be affixed in a conspicuous manner at each means of ingress to every space undergoing any fumigation. Such placards shall display the words "DANGEROUS GASES - KEEP OUT" in letters not less than three inches in height. At the end of every such process of fumigation, it shall be the duty of the person conducting such process, to ventilate thoroughly such premises and to notify the division marshal in charge of the bureau of fire prevention that such premises have been ventilated and are safe to enter.

(b) Exceptions. Where such processes enumerated in paragraph (a) are carried on daily in a gastight room or vault as a part of any production or renovating process, the provisions of this section shall be held to apply only to the space in which such fumigating is done and a monthly return of the notices herein required shall suffice so long as such processes shall be continuous or of daily occurrence.

[4-92-190] 4-104-190 Guards.

Whenever hydrocyanic acid or other dangerous gases or fumes are generated or liberated in any room or portion of a structure in the city, a sufficient number of capable, alert watchmen shall remain on duty at the entrance or entrances to the room, building or enclosed space vacated for gassing, to prevent people from entering while gas is present and for two hours after the room or area gassed is opened for airing. All guards or watchmen shall be reliable persons and must be acceptable as a proper guard by the commissioner of buildings. The licensee shall be held strictly responsible and accountable for the conduct of the guards or watchmen. In every case where the entire building is not vacated, the licensee or his approved representative shall remain on the job

during the progress of fumigation and airing, and shall constantly supervise the occupancy of the structure to insure that no person will be endangered by gas leakage. The licensee shall give all guards definite and proper instructions, and shall visit the premises being fumigated at regular and frequent intervals during the process to insure that they are properly guarded.

[4-92-200] 4-104-200 Food products--Special safety measures.

Before fumigation, the operator shall see that all ice, food and drink are removed from the rooms ordered vacated; except that such food or drink, as is in sealed airtight containers need not be removed. Provided that in industrial fumigations such as flour mills, cereal mills, food warehouses, macaroni plants, candy manufacturing plants, cheese processing plants, etc., where fumigation is for the purpose of destroying vermin or insect pests infesting these foodstuffs, only liquid fats, oils and moist foodstuffs not sealed in airtight containers need be removed. The fumigator shall state in the application for permit to fumigate foodstuffs the amount of moisture content of the various foods it is wished to fumigate. No fumigated food shall be sold or shipped until it has been aerated by every reasonable means, including the use of fans wherever indicated, for a period not less than 36 hours following fumigation and suitable tests approved by the board of health of the air immediately around it are negative for the fumigant used.

[4-92-210] 4-104-210 Fires--Safety measures.

All fires within the premises under gas shall be put out, whenever a flammable gas is used. For the purpose of this chapter, the board of health shall designate upon request whether the gas to be used shall be regarded as flammable or nonflammable. The licensee shall notify the fire department of any rooms, building or structure other than approved vaults which are placed under hydrocyanic acid or other dangerous gas fumigation.

[4-92-220] 4-104-220 Impermeable receptacles--Required.

An impermeable receptacle for containing the ingredients is required in fumigating with hydrocyanic or other dangerous gases.

[4-92-230] 4-104-230 Exposure of cyanic crystals prohibited.

No cyanic crystals shall be dropped on the floor or left exposed where people or domestic animals may come in contact with them in fumigating with hydrocyanic or other dangerous gases.

[4-92-240] 4-104-240 Airing of premises.

At the conclusion of the gassing process in fumigation, it shall be the duty of the operator to throw open doors and windows of the premises, until all rooms have been opened for free access of air. No person other than the operator shall be permitted to enter the premises until all traces of the gas have disappeared, and in no case shall the occupants of the rooms or areas gassed be permitted to enter until 12 hours after airing. The operator or watchmen shall keep all persons away from the doors and windows of

the premises for two hours after airing. Infants and children under six years of age shall not be permitted to re-enter the premises until 18 hours after the rooms or apartments are opened for airing. The licensee shall inform all occupants having children of this provision in writing over his signature. No room or space, except where the whole building is vacated and except upon a ship or vessel when fended off from shore as provided herein, shall be left under gas after the time of sunset. Warnings posted where the natural light between sunrise and sunset is dim shall be artificially illuminated. Warnings on vessels fumigated after sunset shall be artificially illuminated in a manner approved by the department of health.

[4-92-250] 4-104-250 Fumigation residue-Disposal.

The operator shall dispose of the residue left in the jars or containers, and the water used for cleaning such jars or containers, in accordance with the provisions of the federal and state statutes and regulations concerning environmental and toxic waste and hazards.

[4-92-260] 4-104-260 Hydrocyanic acid containers-Department of health approval-Exceptions.

Every container in which hydrocyanic acid, either alone, mixed with or absorbed in, other material is handled, shipped or sold, shall be of a type of construction, material and thickness approved by the department of health, in order that accidental poisonings during handling, storage, and shipment of such containers may be prevented. This approval shall not be necessary where the containers are accepted by the United States officials for interstate shipment.

[4-92-270] 4-104-270 Stink or tear gases.

The department of health may prescribe that a stink gas or tear gas shall be mixed with the hydrocyanic acid gas or other dangerous gases or fumes to be used for fumigating, specifying in whatever detail it shall deem necessary the time and method for the generation or release of such stink or tear gases.

[4-92-280] 4-104-280 License-Revocation-Hearing.

The license of any person violating the provisions of this chapter may be revoked by the mayor upon recommendation of the department of health, who shall give due hearing to the licensee before such recommendation.

[4-92-290] 4-104-290 Violation-Penalty.

Any person who shall violate any of the provisions of this chapter shall be fined not less than \$200.00 nor more than \$500.00 for each offense. Every day such violation continues shall constitute a separate and distinct offense. [not less than \$100.00 nor more than \$200.00 for each offense, and each day that such violation continues shall constitute a separate and distinct offense.]

An application for said license shall be made in conformity with the general requirements of this code relating to applications for licenses. The applicant shall also specify the capacity in gallons of every container or tank installed or to be installed upon the premises.

Every such application shall be investigated by the superintendent of police, the section of plumbing of the department of inspectional services, and the director of the bureau of fire prevention, to determine whether the applicable provisions of this code are being complied with, and the approval of such officers noted thereon, before a license shall be issued.

No insurance broker in the city shall place any insurance with any company, association or corporation not incorporated under the laws of this state which shall be in default for not reporting or making payment as hereinbefore provided, until it shall have complied with all the requirements of this chapter.

[4-108-060] 4-308-060 Violation--Penalty.

Any person violating any of the provisions of this chapter shall be fined not less than \$200.00 nor more than \$500.00 for each offense. Every day such violation continues shall constitute a separate and distinct offense. [not less than \$25.00 nor more than \$200.00 for each offense.]

"Retail florist" means any person or persons regularly engaged in the conduct of an established business for selling, offering for sale or keeping with the intention of selling at retail, cut flowers, bridal bouquets, funeral designs or growing plants, from a fixed and permanent business location.

[4-112-020] 4-200-020 License-Required.

No person shall engage in the business of retail florist or the business of wholesale florist without first having procured a license therefor.

Every person who shall engage in both a retail florist business and a wholesale florist business shall procure a separate license for each. A separate license shall be required for each location, place or premises where the person is located to engage in business, and in the case of an itinerant wholesale florist a separate license shall be required for each vehicle from which flowers, bouquets, funeral floral designs and growing plants are sold.

4-200-030 Retail Florist Omnibus.

"Retail Florist Omnibus" shall refer to establishments for which a retail florist license (4-112-020) and one or more of the following licenses would be required for operation: Food Purveyor Class I (4-344-120); Automatic Food Vending Machines (4-344-390); or a limited business license. When the representative of an establishment indicates in a license application that the establishment for which a license is sought will offer for sale commodities that would require application for two or more of the licenses referred to herein (one of which being a retail florist license), then a single Retail Florist Omnibus License shall be issued in lieu of individual licenses. The Retail Florist Omnibus License shall not change or modify in any way the existing code requirements that apply to each of the licenses referred to herein. Any person seeking a license under this section shall obtain from the City of Chicago Department of Revenue an appropriate city sticker to be placed upon any vending machine or food rack. A person applying for a license under this section shall, at the time of making application, execute an affidavit indicating that only non-potentially hazardous food (as defined in chapter 4-344) will be sold.

4-200-040 Activities Performed Under License

At the time a person submits an application for a Retail Florist Omnibus License, he or she shall specify as part of the written application the activities to be carried out under the license. If at any time following the issuance of the Retail Florist Omnibus License the licensee plans to add other activities not referred to in the application, then the licensee shall so inform the Department of Revenue License Division.

[4-112-030] 4-200-050 License-Application.

An application for any license under this chapter shall be made in conformity with the general requirements of this code relating to applications for licenses. Every application for license as an itinerant wholesale florist shall also contain the address of the applicant. The application shall indicate the nature of the business which the applicant desires to engage in.

Every application for a license to engage in business at a fixed location shall be investigated by the director of fire prevention to determine whether the applicable provisions of this code are being complied with, and the approval of such officer shall be noted thereon before the license is issued.

[4-112-040] 4-200-060 License-Fee.

The annual license fee for a retail florist shall be as set forth in Section 4-5-010. [\$120.00.]

The annual license fee for a wholesale florist shall be as set forth in Section 4-5-010. [\$200.00.]

The annual fee for a Retail Florist Omnibus License shall be as set forth in section 4-5-010.

No license shall be issued for a sum less than the full amount of the annual license fee.

Every location, place or establishment where the business of a florist is conducted, managed or carried on shall be kept in a clean and sanitary condition and free from vermin. No decayed, decaying, unwholesome, contaminated or diseased flowers or plants shall be allowed to remain in or about said establishment. Adequate and convenient washing and toilet facilities shall be provided.

No licensee shall sell or offer for sale any flowers or plants the sale of which is restricted by any federal or state law. Every itinerant wholesale florist shall thoroughly clean each vehicle operated by him in his business once daily and dispose of all decaying flowers or plants in a suitable sanitary manner subject to the approval of the city forester.

[4-112-060] 4-200-080 Inspection and enforcement.

The commissioner of buildings shall cause annual inspections to be made of all florist establishments to determine whether the requirements of this code relating to health, sanitation and safety applicable thereto are being complied with. The general superintendent of forestry, parkways and beautification shall have jurisdiction to enforce the requirements of this chapter applicable to itinerant wholesale florists.

[4-112-070] 4-200-090 Off-premises sales.

Except in the case of an itinerant wholesale florist, no license shall be issued except for a fixed location. The sale of flowers, plants or floral bouquets or designs on the public way or at places other than those at which the licensee is licensed is hereby prohibited.

[4-112-080] 4-200-100 Violation-Penalty.

Any person violating any of the provisions of this chapter shall be fined not less than \$200.00 nor more than \$500.00 for each offense. Every day such violation continues shall constitute a separate and distinct offense. [not less than \$25.00 nor more than \$200.00 for each offense; and every day that such violation shall continue shall constitute a separate and distinct offense.]

Before making such repairs, the contents of the gas holders shall be tested and the analysis of the mixture of air or inert gases therein shall be recorded and reported to the buildings commissioner. Every such gas holder or tank, containing more than 2,500 cubic feet of gas, shall be inspected at least once every five years by a recognized authority, employed by the owner and approved by the buildings commissioner, and a report of all such inspections showing the condition of said gas holder or tank, together with a statement of necessary repairs and the further statement that such repairs have been made and that said gas holder or tank is in a good and safe condition with an expectancy that this condition will endure for the succeeding term of five years, shall be submitted to the buildings commissioner. [4-120-120] 4-112-120 Ventilation.

Every fume or flammable compressed gas room shall have means of natural ventilation as required under Section 15-28-260 for material heating rooms. The combined area of ventilating openings with closures arranged to open automatically in case of explosion or fire shall be not less than five percent of the total wall area.

[4-120-130] 4-112-130 Sign requirements.

Every fume or flammable compressed gas building and every fume or flammable compressed gas room shall have the words "DANGER - POISONOUS GAS" where any fume hazard gas occurs, or the words "DANGER - FLAMMABLE GAS" where any flammable compressed gas occurs, painted in a conspicuous position on the outside of every entrance thereto; provided, however, that no such sign shall be required for any building or room in which not more than two standard cylinders of such gas are present at any time. No-smoking signs shall also be provided wherever flammable compressed gas is stored.

Such wording shall be in plainly legible bright red letters on a white background with letters not less than six inches high and with the principal strokes thereof not less than three-fourths inch in width.

(2) Signs having a white field with red letters four inches high and having a stroke of one-half inch shall be conspicuously posted. Such signs shall read "TOXIC GAS - HANDLE WITH CARE."

(3) Defective containers which permit leakage or spillage shall be disposed of or repaired in an approved manner. No spilled materials shall be allowed to accumulate on floors or shelves.

[4-120-150] 4-112-150 Tank storage.

Tanks, which contain more than 55 gallons of fume hazard and/or flammable compressed gases, shall be located outside of any building or buried below ground level. When above ground, said tank or tanks containing liquids, shall be diked. Each dike shall have a capacity of not less than one and one-half times the combined capacity of the tank or tanks it surrounds. Dike construction shall be as specified in Section 15-24-170 of this code; provided, however, the materials of the dike walls shall be inert with respect to the materials contained within the tank or tanks.

[4-120-160] 4-112-160 Emergency controls.

The provisions of this section shall apply to all existing as well as newly installed tanks. All tanks, piping and fittings shall be compatible with the materials to be stored or handled. Outlets and inlets of all aboveground tanks shall have a shutoff valve as close as possible to the tank, with no branches or outlets between the tank and valve. All inlet pipes shall have an additional check valve as close as possible to the tank valve. In addition to any other valves when the stored material is reactive with air or water, there shall be a valve at each pipe line connection to any tank below the liquid level which valve shall be effective inside the tank shell or head and can be operated manually to prevent the flow of liquid from the tank even though the pipe lines are broken from the tank. All remote reach rods to valves shall be of substantial construction and shall be accessibly located and clearly marked "Emergency Shut-Off Valve." There shall be an effective flexible connection between that tank valve and piping system or the piping shall be so arranged with swing joints to prevent stress and strain between the piping system and tank. Where the exterior piping and sides of the tank are not inert to the material being stored, the piping, piping supports and tank shall be made inert by coating or some other means to one and one-half times the height of the dike.

[4-120-170] 4-112-170 Tank and tank cars--Safety clearances.

Tanks or tank cars of fume hazard and/or flammable compressed gases of any capacity shall not be located within one-eighth mile from any school, institutional unit, multiple dwelling or place of public assembly.

[4-120-180] 4-112-180 Neutralizing agents.

Whenever a fume hazard gas and/or flammable compressed gas can be chemically changed to a less dangerous and more stable material,

a qualified chemist of the manufacturer shall state in writing the safest and quickest method of changing the total capacity of the tank or tanks in case of a rupture, spillage or other emergency. The owner and/or operator of said tank or tanks shall keep sufficient quantities of the changing agent as hereinbefore determined so as to be readily available in the event of an emergency.

[4-120-190] 4-112-190 Emergency equipment.

Oxygen generating or self-contained air or oxygen masks having a United States Bureau of Mines or National Institute of Occupational Safety and Health approval for a minimum of one-half-hour protection shall be maintained in a readily accessible location, outside the areas of probable contamination and sufficient for all personnel associated with the operation.

Additional air or oxygen containers which will provide for a minimum of one-hour use of each mask shall be kept at the location of each gas mask. All personnel that may be required to use gas masks must be required at reasonable intervals to practice their application and use. Gas masks must be kept in condition, ready for immediate use at all times with fully charged containers.

An approved repair kit with all the necessary tools, appurtenances and material required to repair a leak or replace a defective valve or other part shall be kept in a location accessible to the tank and outside the probable area of contamination.

Protective clothing suitable for use with the materials stored shall be provided and be kept in good condition where its use will provide effective protection against the fume hazard gas.

Gas masks, repair kit and duplicate wrenches shall be kept in a conspicuous location and shall be conspicuously labeled for immediate identification.

[4-120-200] 4-112-200 Trucks on public ways.

Vehicles carrying fume hazard or flammable compressed gases shall comply with Sections 15-24-1150 to 15-24-1210, inclusive. Wherever the phrase flammable liquids is used, it shall mean fume hazard and flammable compressed gases and wherever the phrase truck, tank truck, semi-tank truck, or tank vehicle is used, it shall mean vehicles on which fume hazard and flammable compressed gases are transported. The truck shall meet applicable Department of Transportation and/or Interstate Commerce Commission regulations and all requirements of the Municipal Code of the City of Chicago.

[4-120-210] 4-112-210 Tank cars--Special safety clearances.

No installation for the use or storage of liquefied fume

hazard gases in single-unit tank cars shall be located within one-eighth mile from a school, church, institutional building, theater, multiple dwelling or place of public assembly.

[4-120-220] 4-112-220 Tank cars--Unloading procedures.

Tank cars shall comply in all respects with Interstate Commerce Commission or Department of Transportation specifications. They shall be received and unloaded only on a private track of the consumer or on a leased track, protected as hereinafter provided.

Unloading track and unloading area for a distance of 50 feet in all directions from tank cars shall be maintained free of all combustible rubbish and vegetation at all times.

Portions of switch tracks on which such tank cars are placed for unloading shall be devoted solely to this purpose during the unloading period, and wherever possible, shall be a stub or dead-end track.

No more than two tank cars shall be on any licensed premises at one time, namely: the car in use and a replacement for the car in use when it is emptied. The second car shall be subject to all requirements for the first car as herein defined.

Immediately upon spotting a tank car on a siding for unloading, brakes shall be set and wheels shall be blocked to prevent any unauthorized movement thereof.

Unloading connections shall be securely attached before discharge valves are opened and immediately disconnected when unloading is completed.

If normal unloading operations are interrupted and it is necessary to discontinue unloading a tank car for any reason, all unloading connections shall be disconnected. All valves shall first be tightly closed, and the closures of all other openings securely applied.

The unloading lines shall be completely emptied of liquid when unloading is discontinued.

[4-120-230] 4-112-230 Danger signs.

Caution signs which comply with the following regulations of the Interstate Commerce Commission or Department of Transportation regulations shall be provided and used:

Caution signs must be so placed on the track or car as to give necessary warning to persons approaching car from open end or ends of siding and must be left up until after car is unloaded and disconnected from discharge connection. Signs must be of metal, at least 12 by 15 inches in size and bear the words "STOP - TANK CAR CONNECTED" or "STOP - MEN AT WORK" and the word "STOP" being in letters at least four inches high and the other words in letters at least two inches high. The letters must be white on a blue background.

Such signs shall show the name of the specific fume hazard gas in the tank car.

[4-120-240] 4-112-240 Dead-end sidings--Safety measures.

When tank cars are located on a dead-end siding, they shall be

protected from any oncoming car by a locked switch which shall positively prevent collision with the tank car. If on an open siding, tank cars shall be protected by locked switches at both ends. Locked switches shall be located not less than 15 feet from either or both ends of tank cars. Keys for switches shall be available only to persons having certificates of fitness.

If unloading operations are carried on at night, an approved vaporproof red electric light shall be installed at the location of each locked switch and shall be kept lighted at all times when tank car is connected to the unloading line.

[4-120-250] 4-112-250 Tank cars—Building safety clearances.

Minimum tank car safety clearances from adjacent buildings or structures shall be in accordance with the following table:

Nature of Building Construction	Min. Dist. With Fender Wall	Min. Dist. Without Fender Wall
External walls of fire-resistive construction-no openings 25A		15A
External walls of fire-resistive construction-with openings 50A		25A
External walls not of fire-resistive construction		50A
		75A

"Minimum distance" refers to distance between centerline of track and exterior face of building wall.

"No openings" means no windows, doors or other openings in wall opposite car for a distance equal to the length of the car plus 15 feet on both ends and for a height of 25 feet above tank car rail elevation.

"Fender wall" refers to a freestanding wall five feet longer at each end than the length, and five feet higher than the greatest height of the tank cars to be used and shall be interposed between the tank car track and such building. The wall shall be of four-hour fire-resistive construction and shall have a fender or return wall at each end, of same height and thickness and extending at least three feet on the tank car side of such fender wall. It shall be located parallel to the siding and its centerline shall be not less than eight feet and not more than fifteen feet from the centerline of the track.

The minimum tank car safety clearances shall be construed to require a space open its entire area to the sky and shall apply to property dividing lines or adjacent property which may be built upon, to adjoining and adjacent public way, and to any main line of a steam, electric, elevated railway or any other railway right-of-way.

[4-120-260] 4-112-260 Switch engines and car pullers.

If the licensee does not have a private switch engine available at all times to withdraw the tank cars in event of impending damage to the car, he may be required to install an approved car puller which can be used to pull the car to a position of safety.

[4-120-270] 4-112-270 Tank cars--Piping systems

Tank cars shall be unloaded through piping systems which comply with the following requirements:

Extra heavy wrought steel pipe (ASTM Schedule 80) shall be used for all liquefied gas lines and no such pipe shall be larger than one and one-half inches nominal diameter. All joints shall be welded whenever possible. If flanges are required, they shall be of the 300-pound forged steel ammonia type properly welded to the pipe with a continuous bead. Gaskets shall be of a material chemically resistant to the fluid in the line and suitable for the pressures and temperatures involved. Fittings shall be forged steel socket welding type designed for temperatures and pressures to be encountered. Valves shall be of a type specifically designed and manufactured for the particular liquefied gas involved and shall be for a 300-pound minimum operating pressure. One valve shall be placed in the line near the car in an accessible position, and one valve shall be installed immediately before the line enters the building in which such gas is to be used. In addition, one valve shall be provided for each 200 feet of line, one and one-half inches in diameter or smaller. Where piping is exposed to variations in temperature, provisions shall be made for expansion of the piping and for the liquid in the line. One or more expansion loops shall be installed to provide for expansion of the pipe. The number of loops to be provided shall be calculated on the length of the line and extremes of temperature to which the line will be exposed. Adequate anchors shall be provided so that expansion will be in the directions desired. To provide for liquid expansion, one or more expansion chambers shall be installed depending on the length of line. The expansion chamber shall be in accordance with ASME standards for pressure vessels of a size approximately equal to a 150-pound gas cylinder. One such chamber shall be provided for each 500 feet of line of one and one-half inch pipe size or smaller. The expansion chambers shall be inverted over the line and enclosed in an insulated box maintained at a temperature in excess of the critical temperature of the gas involved, at the operating pressure used. The unloading line shall be connected to the car by a semiflexible gooseneck or helical pipe connection that is flanged at one or both ends for connecting and disconnecting. Flexible connection shall be adequately supported and protected against damage.

Overhead lines shall be supported on steel, concrete columns or other noncombustible structure in a manner to conform with the code for pressure piping as approved by the American Society of Mechanical Engineers and American National Standards Institute. All horizontal lines and supporting structures shall have minimum clearance of 23 feet over all roadways, over railroad rights-of-way

and in other locations where they may be endangered by moving objects. In all other locations the minimum clearance between horizontal lines and supporting structures and the ground shall be 15 feet unless such lines are adequately protected from damage by a building of fire-resistive construction. All vertical and inclined risers, at tank cars and at all other points where horizontal lines change from one elevation to another, shall be protected by running them against the web of a wide flange beam weighing not less than 30 pounds per foot. In every case the web of the beam shall be between the pipe and the direction from which it might be struck. Such protective beams shall be supported and anchored so as to afford complete protection against damage to the pipeline.

Underground lines shall be installed in an approved reinforced concrete trench, drained and with removable covers. In lieu of the concrete trench, where not feasible or desirable, the steel conductor pipe shall be protected in the ground by a pipe having pressure-tight joints, acting as a continuous sleeve, fabricated of a material which will not be deteriorated unduly by any chemicals in the soil in which it is located. The conductor pipe and sleeve shall be installed sufficiently deep in the ground to protect against damage from loading on the surface of the ground. The pipe sleeve shall be sealed to the conductor pipe at its ends, outside of the ground either by welding the sleeve to the conductor pipe or by a pressure-tight lead-caulked joint.

A pressure gauge shall be provided which will indicate pressure inside the sleeve in event of a leak in the conductor pipe. A compressed air pressure connection shall also be provided by which the sleeve can be tested for tightness. The vertical pipe from the flexible connection at the tank car to the ground shall be protected against damage by a steel beam as previously described.

Welding procedures shall be qualified under the regulations of the latest edition of the American National Standard Code for Pressure Piping, ANSI B-31.1, and shall meet the approval of the division marshal in charge of bureau of fire prevention. Certificates of each welder's qualifications shall be presented before any work is started.

[4-204-060] 4-228-060 Work requiring customer authorization Estimates.

No work for compensation shall be commenced and no charges shall accrue without specific authorization from the customer in accordance with the following requirements:

(a) Every repair facility shall give to each customer a firm price or a written estimated price for labor and parts for a specific repair, including an estimate of the time necessary to complete the repair, and shall not charge for repair work done or parts supplied in excess of 10 percent or \$15.00, whichever is less, of the estimated price without oral or written consent of the customer. Such consent shall be obtained after it is determined that the estimated price is insufficient and before the work estimated is done or parts estimated are supplied. If such consent is oral the repair shop shall make a notation on the work order and on the invoice of the date, time, name of person authorizing the additional repairs, and telephone number called, if any, together with a specification of the additional parts and labor and the total additional cost. The repair shop shall obtain the customer's consent before any additional work not estimated is done or parts not estimated are supplied.

(b) The motor vehicle repair shop shall include with the written estimated price a statement of any automotive repair service which, if required to be done, will be done by someone other than the repair shop. No service shall be done by other than original repair shop without the consent of the customer, unless the customer cannot reasonably be notified. The repair shop shall be responsible in any case, for any such service in the same manner as if said repair shop had done the service.

(c) In the event that it is necessary to disassemble, or partially disassemble, a vehicle or vehicle component in order to provide the customer with a written estimate for required repair or maintenance, the estimate shall show the cost of reassembly in the event the customer elects not to proceed with the repair or maintenance of the vehicle. The estimate shall also include the cost of parts and necessary labor to replace those expendable items such as gaskets, seals and O rings which are normally destroyed by such disassembly. In the event that the act of

disassembly might prevent the restoration of the same unit to its former condition, the repair shop shall fully inform the customer of that fact in writing on the estimate to tear it down, inspect and report before any disassembly begins. The repair shop shall prepare a written estimated price for labor and parts necessary for the required repair or maintenance. The customer's authorization to proceed with such repair or maintenance shall be obtained in accordance with all laws and regulations applying to a written estimated price for a specific job.

(d) If a repair shop has provided an itemized estimate of repairs, which lists parts to be supplied and labor operations to be performed, and if such repairs have been authorized, no change will be made in the method of repair or parts supplied without the authorization of the customer. The repair shop shall document such authorization by recording on the repair order and on the invoice, the date, time, name of customer, and telephone number called, if any, together with a description of the charges authorized and any change in price.

(e) When the customer is unable to deliver the motor vehicle to the repair shop during business hours and the customer has requested the repair shop to take possession of the motor vehicle for the purpose of repairing or estimating the cost of repairing the motor vehicle, the repair shop shall not undertake the diagnosing or repairing of any malfunction of the motor vehicle for compensation unless such repair shop has complied with all of the following conditions:

(1) The repair shop has prepared a written estimate of the price for labor and parts necessary to repair the motor vehicle; and

(2) By telephone or otherwise, the customer has been given all of the information on the written estimate and the customer has approved the written estimate; and

(3) The customer has given his/her oral or written authorization to the repair shop to make the repairs pursuant to the written estimate.

If such authorization is oral, the repair shop shall make, on both the written estimate and the invoice, a notation of the name of the person authorizing the repairs, the date, the time, and the telephone number called, if any. Any charge for parts or labor in excess of the original estimate must be separately authorized by the customer as provided in Section 4-204-060(d) of this chapter.

(f) After receiving the estimate, the owner or his/her agent may either authorize the repairs at the estimate of cost and time, request return of the motor vehicle in a disassembled state, or assembled in reasonably the same condition as when released to the licensee, in which case the licensee shall make the motor vehicle available for possession within three working days from the time of request, and the licensee shall receive payment for only those items on the schedule of charges to which he/she is entitled. If authorization of an estimate of total charges for repairs and an estimate of time to complete repairs

is made by telephone, the licensee shall record in writing on the work order or invoice the date, time, name of the person authorizing the repairs and the telephone number called together with a list of parts, labor and the total cost.

(g) Should the licensee be unable to complete the repairs in the time estimated, he/she shall notify the owner or his/her agent of this fact, after which notification the owner or his/her agent may request return of the motor vehicle in either an assembled or disassembled state, in which case the licensee shall make the motor vehicle available for possession within three working days from the date of request and the licensee shall receive payment for the work actually done and those items on the schedule of charges to which he/she is entitled.

(h) A customer may waive the right of written estimate if such waiver is voluntary and without coercion by the licensee. A motor vehicle repair shop or anyone in its employ shall not make use of the waiver in an attempt to evade this chapter or the regulations promulgated hereunder. Nothing in this section shall be construed as requiring a motor vehicle repair shop to give a written estimated price if the repair shop does not agree to perform the requested repair.

(i) A motor vehicle repair shop shall not [intentionally] make repairs upon a motor vehicle which are not necessary to correct the malfunction for repair of which its services were sought. A repair shop shall not represent that it has performed work or replaced parts on a motor vehicle when said shop has not performed the work or replaced the parts.

(j) Upon request of the customer at the time the work order is taken, the motor vehicle repair shop shall return replaced parts to the customer upon the completion of the work except such parts as the motor vehicle repair shop is required to return to the manufacturer or distributor under a written warranty or exchange agreement. If such parts must be returned to the manufacturer or distributor, the repair facility at the time the work order is taken and request made shall offer to show, and upon acceptance of such offer or request shall show, such parts to the customer upon completion of the work, except that the repair shop shall not be required to show a replaced part when no charge is being made for the replacement part.

(k) Those parts and components that are replaced and that are sold on an exchange basis are exempt from the provisions of Section 4-204-060(j) of this chapter requiring the return of replaced parts to the customer, provided the customer is advised said parts are not returnable in writing on the estimate and/or invoice. When a request is made prior to commencement of the work the repair facility shall provide a reasonable opportunity to the customer to inspect the part that is to be repaired or replaced.

(l) (1) All motor vehicle repair shops shall give all prospective customers an estimated price quotation or the option to waive the price quotation by completing the following statement with the customer's signature:

You are entitled to a price estimate for the repairs you

have authorized. The repair price may be less than the estimate, but will not exceed the estimate by more than 10% or \$15.00, whichever is less, without your consent. You may waive your right to a written estimate and require that you be notified if the price exceeds an amount you have specified.

You may waive your right to an estimate which gives the repair shop the right to set the price without your permission.

Your signature will indicate your selection.

(a) I request an estimate in writing before you begin repairs.

(b) Please proceed with repairs but call me for approval before continuing if the price exceeds \$

(c) I do not want an estimate and you may set the price of repairs.

Date Time

This estimated price for authorized repairs will be honored if the motor vehicle is delivered to the shop within 10 days.

(2) A customer shall be informed of his/her right to receive or see replaced parts as provided in this section prior to the customer executing any document or engaging the facility or mechanic for the work. The information shall be given to the customer on the fac[t]e of any contract, work order form, or other document evidencing the engagement of the facility or by separate written document, in at least 14 point boldface type, as follows:

You are entitled by law to the return of all parts replaced, except those which are too heavy or large, and those required to be sent back to the manufacturer or distributor because of warranty work or an exchange agreement. You are entitled to inspect the parts which cannot be returned to you.

(3) All motor vehicle repair shops shall give customers the choice of receiving replaced parts by including on all estimate forms the following statement:

. I request the return of parts replaced.
. I do not want replaced parts returned to me.

The above statement shall be in 14 point or larger bold capital typeface and executed with one legible copy to the customer requesting repairs.

(m) The invoice shall show the repair shop's license number and the corresponding business name, address, the date of the invoice, the date the vehicle was presented to the repair shop for repair or servicing, the odometer reading on the vehicle at the date it was left with the repair shop, the odometer reading at the time the invoice was prepared, a promised date of

delivery, if any such date was given, the name of the customer, the description of the vehicle and the terms and time limit of any guarantee for the repair work performed. In addition the invoice shall describe all repair work done by a motor vehicle repair shop, including all warranty work, and shall separately identify each part supplied in such manner that the customer can understand what was purchased, including the name of the manufacturer of such parts and the total price charged for all parts and labor. Service work and parts shall be listed separately on the invoice, which shall also state separately the subtotal prices for service work and for parts, not including sales tax, and shall state separately the sales tax, if applicable, to each. The name of any distributor giving a warranty of 90 days or more and/or 3,000 miles may be recorded on the invoice in lieu of the name of the manufacturer of the parts. If any used, rebuilt or reconditioned parts are supplied, the invoice shall clearly state that fact. If a part of a component system is composed of new and used, rebuilt or reconditioned parts, the invoice shall clearly state that fact. A legible copy of such invoice shall be given to the customer and a legible copy will be retained by the motor vehicle repair shop for a period of two years from the time of repair as a part of the repair shop's records.

(n) A motor vehicle repair shop shall not perform any services not authorized by the customer by a work order. If a repair shop prepares a written work order, a legible copy shall be given to the customer. If a written work order is prepared by the customer, such work order shall be attached to the invoice. If the customer gives an oral work order, the oral work order shall be noted on the invoice and shall include the date, time, manner of authorization, telephone number called, if any, and by whom such authorization was given. For the purposes of this section, the standard work order agreement provisions are as follows:

- (1) Authorization of repairs to be made;
- (2) Permission to operate the motor vehicle;
- (3) Acknowledgment of mechanic's lien to secure amount of repairs;
- (4) Limitation on liability for loss or damage, if any.

(o) All repair work performed by the motor vehicle repair shop and all parts used to perform such repairs shall be warranted for a minimum of 90 days and/or 3,000 miles or there shall be a statement on the estimate and invoice to the effect that the work performed or parts supplied by the motor vehicle repair shop are not warranted for said period.

(1) If a licensee provides a warranty on repair parts and labor, he/she shall put it in writing and give a legible copy to the customer. The customer's copy of the warranty must contain:

(a) The nature and extent of the warranty including a description of parts or service included or excluded from the warranty;

(b) The duration of the warranty and requirements to be

performed by warrantee before the warrantor will fulfill the warranty;

(c) All conditions, limitations and the manner in which the warrantor will fulfill the warranty, such as repair, replacement or refund;

(d) Any options of the warrantor or warrantee; and

(e) The warrantor's identity and address.

(2) When repair or diagnostic work is performed pursuant to a warranty, a licensee shall give an estimate of time to complete the repairs as required in Section 4-204-060(a) of this ordinance.

(3) The customer shall be furnished with all warranty information as required by the Federal Magnuson-Moss Warranty - Federal Trade Commission Improvement Act (15 U.S.C. Section 2301, et seq.) and regulations issued pursuant to said Act.

(p) A motor vehicle repair shop shall operate a customer's vehicle while in its possession only in accordance with the directions of the customer or as is necessary repair or road test the vehicle.

(q) Other than the disclosures and statements required by this chapter, if any other preprinted provision is stipulated on a document which the customer signs, it must be no smaller than eight point type. If any provisions appear on a side other than that which the customer signs a notice must appear just above the customer's signature calling attention to additional terms and conditions and their location on the document.

(r) (1) Before taking custody of a motor vehicle, the licensee or his/her agent, shall provide the owner or his/her agent with a written itemized schedule of charges, if such charges are made, to include the following items:

(a) Charges for making an estimate of repairs;

(b) Total charges for release of the motor vehicle in reasonably the same condition as when delivered to licensee if repairs are not made;

(c) Total charges for release of the motor vehicle in a disassembled state if it is not repaired;

(d) Towing charges;

(e) Storage charges;

(f) Itemized list of all other charges, other than those included in the estimate.

(2) Written estimates must indicate the hour labor charge and how it is computed; i.e., by clock hours or flat rate. If flat rate, the manual used must be specified. However, a repair shop may utilize a job rate which covers both labor and parts, provided a list of parts is included in the estimate and invoice. If flat rate time is used, the customer shall be shown relevant time rates as listed in the manual, on request.

(3) Except for the estimated price a licensee shall not charge a person for a service not recorded on the schedule of charges. The licensee shall retain one copy of the schedule of charges signed by the motor vehicle owner or his/her agent for a period of two years.

(4) If the motor vehicle is brought to a licensee's establishment by a towing service, which is either an agent of the motor vehicle owner or an agent of the licensee, and there is no opportunity for the licensee to present a schedule of charges to the owner before taking custody, the licensee shall provide, either in writing or by telephone, a schedule of charges at the time of giving the estimate of repairs.

(5) Upon reasonable notice a customer may remove a vehicle from a repair shop, during the repair shop's business hours upon paying for:

(a) Labor actually performed;

(b) Parts actually installed;

(c) Parts ordered specifically for the customer's car if the order is not cancellable or the parts not returnable for cash or credit;

(d) Storage charges imposed in accordance with the schedule of charges.

(6) A customer has the right to inspect his/her vehicle before paying for repair work. The inspection must be on the premises of the repair shop. Nothing in this chapter shall be construed as allowing a customer to remove his/her car from the premises of the repair shop before paying the bill.

[4-204-070] 4-228-070 Maintenance of records--Advertising requirements.

(a) Each motor vehicle repair shop shall maintain copies of estimates, work orders, invoices, parts purchase orders, appraisals and schedules of charges prepared by that repair shop. Such copies shall be kept for two years and shall be available for inspection by the commissioner of consumer services or his/her designee during all business hours.

(b) A licensee shall disclose in any published or broadcasted advertisement relating to motor vehicle repair the following information:

(1) The name of the licensee, as shown on the license;

(2) The street address of the motor vehicle repair shop;

(3) If a repair shop does not perform repairs on motor vehicles but takes custody of motor vehicles and contracts all repairs to another, it must so state this fact.

(c) An advertisement by a licensee of a warranty which provides for adjustment on a prorata basis shall conspicuously disclose the basis on which the warranty will be prorated.

(d) No motor vehicle repair shop shall publish, utter or make or cause to be published, uttered or made any false or misleading statement or advertisement which is known to be false or misleading, or which by the exercise of reasonable care should be known to be false or misleading. In determining whether any advertisement, statement or representation is false or misleading, it shall be considered in its entirety as it would be read or heard by persons to whom it is designed to appeal. An advertisement, statement or representation shall be considered to be false or misleading if it tends to deceive the public or

[4-204-120] 4-228-120 Ball joint assemblies--Inspection, sale and installation.

This section applies to the inspection, sale and installation of ball joints, which for the purpose of this chapter are defined as ball-and-socket assemblies designed to carry the vertical and horizontal stresses in the front suspension system of a motor vehicle while permitting steering and suspension movement. All motor vehicle repair shops engaged in the sale and installation of ball joints shall be subject to the following requirements:

(1) Except as set forth in parts (5) and (6) of this section, any determination that a ball joint is worn or loose shall be made with an instrument specifically designed and manufactured for measurement of ball joint wear or looseness.

(2) The instrument required by part (1) of this section shall be used, calibrated and maintained in accordance with the instructions issued by its manufacturer. The manufacturer shall be an original equipment manufacturer or a manufacturer who is generally known within the automotive repair industry as a supplier of such instruments.

(3) The measurement of wear or looseness of a ball joint shall be stated in thousandths of an inch (.001) or in millimeters, whichever is appropriate to the vehicle and to the specifications of the original equipment manufacturer or of the replacement parts manufacturer.

(4) If a ball joint is sold and installed, the degree of wear or looseness of the ball joint being replaced must be recorded on the customer's invoice in accordance with part (3) of this section. The maximum allowable wear or looseness permitted by the original manufacturer must be stated.

(5) If a ball joint is equipped with an integral means of measuring wear or looseness, such measurement shall be made and reported in accordance with the manufacturer's directions.

(6) A ball joint that has been manufactured with a means of manual adjustment to compensate for wear shall be adjusted in accordance with the instructions of the manufacturer.

[4-204-130] 4-228-130 Rebuilding of automatic transmissions.

The following minimum requirements specifying accepted trade standards for good and workmanlike rebuilding of automatic transmissions are intended to define terms that have caused confusion to the public and unfair competition within the automotive repair industry. These minimum requirements shall not be used to promote the sale of "rebuilt" automatic transmissions when a less extensive and/or costly repair is desired by the customer. Any automotive repair shop who represents to customers that the following provisions require the rebuilding of automatic

transmissions is subject to the sanctions prescribed in Section 4-204-110 of this chapter.

All motor vehicle repair shops engaged in the repair, sale and installation of automatic transmissions in vehicles covered under this chapter shall be subject to following minimum requirements:

(1) Before an automatic transmission is removed from a motor vehicle for purposes of repair or rebuilding, it shall be inspected. Such inspection shall determine whether or not the replacement or adjustment of any external part or parts will correct the specific malfunction of the automatic transmission. If minor service and/or replacement or adjustment of any external part or parts and/or of companion units can reasonably be expected to correct the specific malfunction of the automatic transmission, then prior to removal of the automatic transmission from the vehicle, the customer shall be informed of that fact as required by Section 4-204-060 of this ordinance.

(2) When the word "exchange" is used with any of the following expressions, it shall mean that the automatic transmission is not the customer's unit that was moved from the customer's vehicle. An automatic transmission shall be described by a word such as "rebuilt," "remanufacturer," "reconditioned" or "overhauled," or by any expression of like meaning, only if the following work has been done since the transmission was last used:

(a) All internal and external parts, including case and housing, have been thoroughly cleaned and inspected;

(b) The valve body has been disassembled and thoroughly cleaned and inspected;

(c) All front and intermediate bands have been replaced with new or relined bands;

(d) All the following parts have been replaced with new parts:

Lined friction plates;

Internal and external seals;

Metal sealing rings that are used in rotating applications;

Gaskets;

Organic media disposable-type filters (if the transmission is so equipped);

(e) All impaired, defective or substantially worn parts not mentioned above have been restored to a sound condition or replaced with new, rebuilt or unimpaired parts. All measuring and adjusting of such parts have been performed as necessary.

(3) The torque converter is considered to be part of the automatic transmission and shall be examined, cleaned and made serviceable before the rebuilt transmission is installed. If the torque converter cannot be restored to a serviceable condition, then the customer shall be so informed. With the customer's authorization, the converter shall be replaced with a new, rebuilt or unimpaired used torque converter.

If any provision, clause, sentence, paragraph, section or part of this chapter, or application thereof to any person, firm, corporation, public agency or circumstance, shall, for any reason, be adjudged by a court of competent jurisdiction to be unconstitutional or invalid, said judgment shall not affect, impair or invalidate the remainder of this chapter and the application of such provision to other persons, firms, corporations, public agencies or circumstances, but shall be confined in its operation to the provision, clause, sentence, paragraph, section or part thereof directly involved in the controversy in which such judgment shall have been rendered and to the person, firm, corporation, public agency or circumstance involved. It is hereby declared to be the legislative intent of the city council that this chapter would have been adopted had such unconstitutional or invalid provision, clause, sentence, paragraph, section or part thereof not been included.

(c) No person acting as superintendent or manager, or who is otherwise in charge or control of any facility, nor any person connected with any facility, nor any person connected with any facility in any capacity whatsoever as nurse, physician, or attendant, shall order, permit or allow the body of any resident or person who has been under care in such facility, and who shall have died therein to be removed from such facility at any time within 24 hours after the time of death, unless the removal of such body has been authorized in advance according to a written statement by the resident or in writing by some member of the immediate family of such deceased person or by some person legally authorized to order or permit such a removal or the

facility can demonstrate a reasonable effort to secure such written authorization, and no such body shall be removed otherwise than in accordance with the provisions of Section 7-16-100 of the Municipal Code of the City concerning the removal of dead bodies; provided that no body shall be kept at any facility longer than 36 hours after death without permission from the department.

[4-220-190] 4-96-190 Treatment by prayer or spiritual means.

Nothing in the provisions of this chapter shall be construed as authorizing or requesting the medical supervision, regulation or control of the remedial care or treatment of residents in any facility conducted for those who rely upon treatment by prayer or spiritual means in accordance with the creed or tenets of any well recognized church or religious denomination. A license is required and all remaining rules and regulations and minimum standards shall apply.

[4-220-200] 4-96-200 Request for investigation.

(a) A person who believes that this chapter, as now or hereafter amended, or any of the minimum standards, rules or regulations promulgated hereunder or the Illinois "Nursing Home Care Reform Act of 1979," as now or hereafter amended, or any of the rules and regulations promulgated thereunder have been violated, may request an investigation. The request may be submitted to the department in writing, by telephone or by personal visit. An oral complaint shall be reduced to writing by the department.

(c) The complaint, a copy of the complaint or a record published, released or otherwise disclosed to the facility shall not disclose the name of the complainant unless the complainant consents in writing to the disclosure or the investigation results in a judicial proceeding, or unless disclosure is essential to the investigation. The complainant shall be given the opportunity to withdraw the complaint before disclosure. Upon the request of the complainant, the department may permit the complainant or his representative to accompany the person making the on-site inspection of the facility.

(d) Upon receipt of a complaint, the department shall cause an investigation to be made into whether any statute, ordinance, rule, regulation or minimum standard has been, is being, or is in danger of being violated.

The room or rooms thus provided shall have a handwashing sink with hot and cold running water supply.

(b) It shall be the duty of every person conducting or operating any facility within the city of Chicago to cooperate with the department in minimizing the danger of transmission of communicable diseases as set forth in the minimum standards, rules and regulations promulgated by the board of health.

They shall, upon request, produce identification to establish their identity. No such person shall enter the immediate living area of any resident without first identifying himself and then receiving permission from the resident to enter. The rights of other residents present in the room shall be respected. A resident shall have the right to terminate at any time a visit by a person having access to the resident's living area. Any individual denied access to a facility may request a hearing under the provisions of this section.

(c) The provisions of this section shall not limit the power of the department or other public agencies otherwise permitted or required by law to enter and inspect a facility.

(d) The department, whenever the commissioner deems necessary, but not less than annually, shall inspect, survey and evaluate every facility to determine compliance with applicable licensure and certification requirements and minimum standards, rules and regulations. The department may periodically visit a facility for the purpose of consultation. An inspection, survey or evaluation, other than an inspection of financial records, shall be conducted without prior notice to the facility. A visit for the sole purpose of consultation may be announced.

(e) Any officer, employee or agent of the city charged with inspecting, surveying and evaluating facilities, who directly or indirectly gives prior notice of an inspection, survey or evaluation other than an inspection of financial records, to a facility or to an employee of a facility shall be subject to a fine of not less than \$100.00 and not more than \$200.00 and a sentence of not more than six months imprisonment or both.

(f) Any holder of a license or applicant for a license shall be deemed to have given consent to any authorized officer, employee or agent of the city to enter and inspect the facility in accordance with this chapter. Refusal to permit such entry or inspection shall constitute grounds for denial, nonrenewal, suspension or revocation of license as provided in this chapter.

(g) The department shall require periodic reports and shall have access to books, records and other documents maintained by the facility to the extent necessary to carry out the provisions of this chapter, as now or hereafter amended, and any of the minimum standards, rules and regulations promulgated hereunder, and the Illinois "Nursing Home Care Reform Act of 1979," as now or hereafter amended, and any of the rules and regulations promulgated thereunder.

[4-220-250] 4-96-250 Maintenance of records.

(a) Each facility shall maintain records for each resident which shall include the name, address, age, sex, marital status, information required for the filling in of a death certificate, and the date of admission and discharge or disposition of each resident in the facility, a medical record, physician's order record, nursing notes, and shall make a reasonable effort to establish and maintain a list of resident's small items of value.

(b) Accurate record of financial transactions involving use of resident's funds shall be on file in the facility.

Such reports shall contain the names and residence of all persons suffering from any such disease together with such other information as may be required by the department.

(4) Written reports shall be made to the department on or before the fifth day of each calendar month, showing a complete record of the facility during the preceding month, including the names and addresses of residents who have died during the month, the cause of each death, and such other information as may be required by the department.

(5) All reports required to be made to the department in writing shall be made in full upon forms furnished for that purpose by the department and shall be signed by the chief physician, manager or licensee in charge of the facility.

[4-220-270] 4-96-270 Prohibited acts-Violation-Penalty.

(a) No person shall:

(1) Prevent, interfere with, or attempt to impede in any way the work of any duly authorized representative of the city or its agencies or employees in the investigation and enforcement of this chapter;

(2) Prevent or attempt to prevent any such representative

from examining any relevant books or records in the conduct of official duties under this chapter;

(3) Prevent or interfere with any such representative in the preservation of evidence of any violation of this chapter;

(5) Wilfully file any false, incomplete or intentionally misleading information required to be filed under this chapter; or

(6) Open or operate a facility without a license.

(b) Any person violating any of the provisions of Section 4-220-270(a) shall be subject to a fine of not less than \$200.00 and not more than \$400.00 and a sentence of not more than six months imprisonment, or both, for each offense. Each day such violation shall continue shall constitute a separate and distinct offense.

[4-220-280] 4-96-280 Notice of violation.

(a) If upon inspection or investigation the commissioner determines that a facility is in violation of this chapter, as now or hereafter amended, or any of the minimum standards, rules and regulations promulgated hereunder, or the "Illinois Nursing Home Care Reform Act of 1979," as now or hereafter amended or any of the rules and regulations promulgated thereunder, the commissioner shall promptly serve notice of violation upon the licensee at the last known address of the licensee as shown in the records of the department.

Each notice of violation shall be prepared in writing and shall specify the nature of the violation and the provision or rule alleged to have been violated. The notice shall inform the licensee of any action the commissioner may take including, but not limited to, the requirement of a facility plan of correction under the provisions of this section, assessment of a penalty under the provisions of Section 4-220-300; issuance of a conditional license under the provisions of Section 4-220-310; placement of the facility on a list prepared under the provisions of Section 4-220-290; or license revocation or suspension under the provisions of Section 4-220-110. The notice shall also inform the licensee of his right to a hearing under the provisions of Section 4-220-120.

(b) Each day of violation constitutes a separate violation for purposes of assessing penalties under the provisions of Section 4-220-300. No penalty may be assessed for a condition for which the facility has received a variance or waiver of a standard under Title XVIII or XIX of said Federal Act.

(c) A situation, condition or practice constituting a Type A violation shall be abated or eliminated immediately unless a fixed period of time, not exceeding 15 days, as determined by the department and specified in the notice of violation, is required

for correction.

(d) At the time of issuance of a Type B or Type C violation, the commissioner shall request a plan of correction from the licensee, which is subject to the department's approval. The licensee shall have 20 days after receipt of notice of violation in which to prepare and submit a plan of correction. The commissioner may extend this period up to 30 days where correction involves substantial capital improvement. The plan shall include a fixed time period not in excess of 90 days within which violations are to be corrected.

If the commissioner rejects a plan of correction, he shall send notice of the rejection and the reason for the rejection to the licensee. The licensee shall have 10 days after receipt of the notice of rejection in which to submit a modified plan. If the plan or modified plan is not timely submitted, or if the modified plan is rejected, the facility shall follow an approved plan of correction imposed by the commissioner.

(e) If the violation has been corrected prior to submission and approval of a plan of correction, the licensee may submit a report of correction in place of a plan of correction. Such report shall be signed by the administrator under oath.

(f) Upon a licensee's petition, the department shall determine whether to grant a licensee's request for an extended correction time. Such petition shall be served on the commissioner prior to expiration of the correction time originally approved. The burden of proof is on the petitioning licensee to show good cause for not being able to comply with the original correction time approved.

(g) If a licensee desires to contest any action under the provisions of this section, the licensee shall send a written request for a hearing under the provisions of Section 4-220-120 of this chapter.

[4-220-290] 4-96-290 Violation list.

The department shall prepare on a monthly basis a list containing the names and addresses of all facilities with an existing Type A violation or with five or more existing violations of any type for which a plan of correction has not been timely submitted to the commissioner, for which a plan of correction has been disapproved, or for which an approved plan of correction has not been carried out. The list shall specify the number and type of each facility's violations. A copy of the monthly list of violators shall be sent to the Director of the Illinois Department of Public Health. The department shall notify each facility placed on the list of such placement at least 10 days prior to issuance of the list. Any facility placed on the list may request a hearing provided under the provisions of Section 4-220-120 of this chapter.

A facility shall be removed from the list when all corrections are made or when a plan of correction for all deficiencies is approved by the department. The list shall also indicate those facilities which have been removed from the list

during the prior month.

[4-220-300] 4-96-300 Violation--Penalties.

(a) The licensee of a facility which is in violation of this chapter, as now or hereafter amended, or any of the minimum standards, rules and regulations promulgated hereunder, or the Illinois "Nursing Home Care Reform Act of 1979," as now or hereafter amended, or any of the rules and regulations promulgated thereunder, may be subject to the penalties levied directly by the commissioner as provided herein.

(1) Unless a greater penalty is allowed under subsections (4), (7), and (8), a person who commits a Type A violation is subject to a penalty computed at a rate of \$4.50 per resident in the facility plus \$.15 per resident for each day of the violation, commencing on the date the violation is discovered and ending on the date the violation is corrected, or a fine of not less than \$1,000.00, whichever is greater.

(2) Unless a greater penalty is allowed under subsections (4), (7), and (8), a person who commits a Type B violation is subject to a penalty computed at a rate of \$3.00 per resident in the facility plus \$.10 per resident for each day of the violation, commencing on the date the violation is discovered and ending on the date the violation is corrected, or a fine of not less than \$750.00, whichever is greater.

(3) Unless a greater penalty is allowed under subsections (4), (7), and (8), a person who commits a Type C violation is subject to a penalty computed at a rate \$1.50 per resident in the facility plus \$.05 per resident for each day of the violation, commencing on the date the violation is discovered and ending on the date the violation is corrected, or a fine of not less than \$500.00, whichever is greater.

(4) A person who commits a Type A B or C violation which continues beyond the time specified in paragraphs (c) or (d) of Section 4-220-300 is subject to a penalty computed per resident per day under subsections (1), (2) or (3).

(5) For the purpose of computing a penalty under subsections (2) through (4), the number of residents per day shall be based on the average number of residents in the facility during the 30 days preceding the discovery of the violation.

(6) When the commissioner finds that a provision of Section 4-220-370 of this chapter has been violated with regard to a particular resident, the commissioner shall issue an order requiring the facility to reimburse the resident for injuries incurred, or \$100.00, whichever is greater.

(7) If the violation or group of violations results from inadequate staffing, a penalty may be imposed equal to the total difference between the cost of the staff actually employed and the estimated cost of the staff required. The number of staff required shall be determined by the provider contract, by court order, or by the commissioner by rule, whichever is greatest. The inadequate staff shall be presumed to exist from the date of the notice of violation.

(8) A facility which violates an ordinance, statute, rule or regulation, or minimum standard and which has received notices of violations of the same ordinance, statute, rule or regulation, or minimum standard on two or more separate occasions within the prior two-year period is subject to a penalty of three times the amount authorized by subsections (1), (2) or (3) for the class of violation involved.

(9) A notice of violation found to be unjustified after hearing may not be considered in determining whether to apply the penalties provided herein.

(b) In determining whether a penalty is to be imposed and in fixing the amount of the fine, if any, for a violation, the commissioner shall consider the following factors:

(1) The gravity of the violation including the probability that death or serious physical or mental harm to a resident may result or has resulted, the severity of the actual or potential harm, and the extent to which the provisions of the applicable statutes, rules or regulations or minimum standards were violated;

(2) The reasonable diligence exercised by the licensee and the efforts to correct violations;

(3) Any previous violations committed by the licensee; and

(4) The financial benefit to the facility of committing or continuing the violation.

(c) If the commissioner determines that a penalty should be assessed for a particular violation or for failure to correct it, he shall send a notice to the facility. The notice shall specify the amount of the penalty assessed, the section, ordinance, statute, rule, regulation or minimum standard violated and shall inform the licensee of a right to a hearing under the provisions of Section 4-220-120 of this chapter.

(d) In the case of a Type A violation, a penalty may be assessed from the date on which the violation is discovered. In the case of a Type B or Type C violation, the facility shall submit a plan of correction as provided under the provisions of Section 4-220-280. If a plan of correction is approved and carried out, no penalty may be assessed on the violation during the time period specified in the approved plan of correction. If a good faith plan of correction is not received within the time provided herein, a penalty may be assessed from the date of discovery of the Type B or C violation until the date of the receipt of a good faith plan of correction, or until the date the violation is corrected, whichever is earlier. If a violation is not corrected within the time specified by an approved plan of correction or any lawful extension thereof, a penalty may be assessed from the date of discovery of the violation, until the date the violation is corrected.

(e) All penalties or fines shall be paid to the department of finance within 10 days of receipt of notice of assessment for use by the department in enforcement of this chapter or if the penalty or fine is contested, within 10 days of receipt of the final decision of the commissioner unless the decision is

appealed and stayed by court order.

If the person or facility against whom a penalty has been assessed does not comply with a written demand for payment within 30 days, the Commissioner shall issue an order to do any of the following:

(1) Add the amount of the penalty to the facility's licensing fee; if the licensee refuses to make the payment at the time of application for renewal of its license, the license shall not be renewed; or

(2) Bring an action in Circuit Court to recover the amount of the penalty.

(f) In addition to the right to assess penalties provided herein, the commissioner may issue a conditional license under the provisions of Section 4-220-310 of this chapter.

(g) The levying of a penalty or fine by the commissioner shall not be construed to preclude the revocation or suspension of any license issued under the provisions of this chapter.

[4-220-310] 4-96-310 Conditional license.

(a) The commissioner may direct that the department of finance issue a conditional license to any facility if the commissioner finds that either a Type A or Type B violation exists in such a facility. The issuance of a conditional license shall revoke any license of the facility.

(b) Prior to the commissioner's direction to the department of finance that a conditional license be issued, the commissioner shall review and approve the written plan of correction. Retention of the conditional license shall be conditional on meeting the requirements of the plan of correction.

(c) The commissioner shall notify the licensee in writing of the decision to issue a conditional license and such notice shall specify in writing the violations which prevent full licensure and shall state a time schedule for correction of deficiencies.

(d) A conditional license shall be issued for a period specified by the commissioner but in no event for more than one year. The commissioner shall periodically inspect any facility operating under a conditional license. If the commissioner finds substantial failure by the facility to follow the plan of correction, the conditional license may be revoked as provided under Section 4-220-110.

(e) If the commissioner determines that a conditional license shall expire without renewal or replacement by a regular license, the commissioner shall notify the licensee, in writing, at least 30 days prior to the expiration of the conditional license. The notice shall inform the licensee of the right to a hearing under the provisions of Section 4-220-120 of this chapter.

[4-220-320] 4-96-320 Public nuisance declared.

The operation or maintenance of a facility in violation of this chapter, as now or hereafter amended, or any of the minimum standards, rules and regulations promulgated hereunder or the

Illinois "Nursing Home Care Reform Act of 1979," as now or hereafter amended, or any of the rules and regulations promulgated thereunder, is declared a public nuisance inimical to the public welfare. The city of Chicago may, in addition to other remedies herein provided, bring action for an injunction to restrain such violation or to enjoin the future operation or maintenance of any such facility.

[4-220-330] 4-96-330 Remedies not exclusive.

The remedies provided by this chapter are cumulative and shall not be construed as restricting any party from seeking any remedy, provisional or otherwise, provided by law for the benefit of the party, or from obtaining additional relief based upon the same facts.

[4-220-340] 4-96-340 Resident's clinical records-Disclosure conditions.

No part of this chapter shall be construed to lessen any requirement, edition or restriction regarding disclosure of a resident's clinical records imposed by the United States, the state of Illinois or the city, whether by statute, ordinance, rule or regulation, or judicial decision.

[4-220-350] 4-96-350 Severability.

If any provision, clause, sentence, paragraph, section or part of this ordinance shall, for any reason, be adjudged by a court of competent jurisdiction to be constitutional or invalid, said judgment shall not affect, impair or invalidate the remainder of this ordinance.

Any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term. The board shall meet as frequently as the chairman deems necessary, but not less than four times each year. Upon request by seven or more members the chairman shall call a meeting of the board. The

board members shall be reimbursed their actual expenses incurred in the performance of their duties.

(c) The department shall consult with the advisory board on matters of policy affecting administration of this chapter, and in the development and revision of minimum standards, rules and regulations promulgated thereunder.

[4-220-370] 4-96-370 Resident's rights, benefits and privileges.

Chapter [4-224] 4-236 PARKING LOT AND GARAGE OPERATIONS TAX

[4-224-010] 4-236-010 Definitions.

For the purpose of this chapter, whenever any of the following words, terms or definitions are used herein, they shall have the meaning ascribed to them in this section:

"Motor vehicle" means any vehicle which is self-propelled.

"Operator" means any person conducting the operation of a parking lot or garage, as defined by this chapter, or receiving the consideration for parking or storage of motor vehicles at such parking place.

"Parking lot" or "garage" means any building, structure, premises, enclosure or other place, whether enclosed or not, except a public way, within the city of Chicago, where two or more motor vehicles are stored, housed or parked for hire, charge, fee or other valuable consideration in a condition ready for use, or where rent or compensation is paid to the owner, manager or lessee of the premises for the housing, storing, sheltering, keeping or maintaining of such motor vehicles; provided, however, that said terms shall not include residential parking provided for single-family homes or multiple-family dwelling units wherein an arrangement for such parking is provided on a rental basis to meet the terms of the Chicago Zoning Ordinance for off-street parking, the consideration therefor being set forth in the house or apartment lease or in a separate writing between the landlord and tenant, whether the parking charge is payable to the landlord or to the operator of the parking lot or garage.

"Person" means any natural person, trustee, court-appointed representative, syndicate, association, partnership, firm, club, company, corporation, business trust, institution, agency, government corporation, municipal corporation, district or other political subdivision, contractor, supplier, vendor, vendee, operator, user or owner, or any officers, agents, employees or other representative, acting either for himself or for any other person in any capacity, or any other entity recognized by law as the subject of rights and duties. The masculine, feminine, singular or plural is included in any circumstances.

[4-224-020] 4-236-020 Tax imposed.

(a) There is hereby levied and imposed upon the use and privilege of parking a motor vehicle in or upon any parking lot or garage, as defined in this chapter, in the city of Chicago a tax of \$.90 for each such motor vehicle parked in or on each parking lot or garage for every 24-hour period or any fraction thereof. If a motor vehicle is parked in or on a parking lot or garage for which a charge is made on a weekly or monthly basis, the amount of tax shall be \$4.50 per week or \$18.00 per month. The parking tax herein imposed applicable for a period other than daily, weekly or monthly, shall be computed by multiplying the sum of \$.90, \$4.50 or \$18.00, whichever amount is applicable, by the total number of days, weeks or months in the particular period of time involved. The weekly tax of \$4.50 and the monthly tax of \$18.00 shall not be increased or decreased on account of Saturdays, Sundays or legal holidays falling within such weekly or monthly period of time, whether or not the motor vehicle is actually parked in or on said parking lot or garage on such days.

(b) The ultimate incidence of and liability for payment of said tax is to be borne by the person who seeks the privilege of occupying space within said parking lot or garage, said person hereinafter referred to as "recipient."

(c) The tax imposed by this chapter shall not apply to residential off-street parking of house or apartment tenants required by the Chicago Zoning Ordinance, wherein an arrangement for such tenant parking is provided in the house or apartment lease or in a separate writing between the landlord and tenant, whether the parking charge is payable to the landlord or to the operator of the parking lot or garage.

(d) The tax herein levied shall be paid in addition to any and all other taxes. It shall be the duty of the operator of every parking lot or garage to secure said tax from the recipient of the parking privilege and to pay over to the Director of Revenue said tax under procedures prescribed by the Director of Revenue, and as otherwise provided in this chapter.

(e) Every person required to collect the tax levied by this chapter shall secure said tax from the recipient at the time he collects the price, charge or rent to which it applies. If the recipient is given any invoice, receipt, or other statement or memorandum of said price, charge or rent paid or payable the tax shall be stated, charged and shown separately on said documents.

[4-224-030] 4-236-030 Rules and regulations Authorized Publication.

The director of revenue shall make and publish in pamphlet form, for distribution to the public, rules and regulations appropriate to and in furtherance of the purpose of this chapter.

[4-224-040] 4-236-040 Inspection.

The director of revenue, or any person certified by him as his deputy or representative, may enter the premises of any parking lot or garage for inspection and examination of books and records for the proper administration of this chapter and enforcement of the collection of the tax imposed. It is unlawful for any person to prevent, hinder or interfere with the director of revenue or his duly authorized deputy or representative in the discharge of his duties in the enforcement of this chapter.

[4-224-050] 4-236-050 Maintenance of records.

It shall be the duty of every person operating a parking lot or garage in the city of Chicago to keep accurate and complete books and records to which the director of revenue, or his deputy, or representative authorized by him, shall at all times have full access, which records shall include a daily sheet showing (a) the number of motor vehicles parked in or on each lot or garage, segregated on a daily, weekly, monthly or other basis and (b) the actual parking lot or garage tax receipts collected from all parking transactions.

[4-224-060] 4-236-060 Claim checks, tickets and stickers.

(a) It shall be the duty of every person operating a parking lot or garage in the city of Chicago to issue to the owner or operator of any motor vehicle left in his custody for parking a distinctive ticket, or claim check or sticker.

(b) Tickets or claim checks shall be kept in numerical sequence and shall consist of three parts, one of which shall be issued by the operator to each recipient; a second part to be retained by the operator, who shall indicate on the back thereof the time of arrival and departure of the motor vehicle; and the third portion of which shall be placed upon the vehicle parked for the purpose of identification. Each such ticket or claim check shall contain the name of the operator of the parking lot or garage; the address of each lot or garage upon which motor vehicles are parked; identical numbers on each part of the three-part ticket or claim check; the number of the license plate on the motor vehicle and the issuing state; whether the parking service rendered is on a daily, weekly or monthly basis; and the total charge for parking each motor vehicle.

Chapter [4-304] 4-348 TAXICABS[4-304-010] 4-348-010 Definitions.

The definitions of the words and phrases in Chapter 9-80 of the Municipal Code of Chicago apply to the same words and phrases when used in this ordinance.

"Licensee" means every person having one or more licensed taxicabs who has filed with the city clerk formal written acceptance of this ordinance.

[4-304-020] 4-348-020 Permission to operate taxicabs granted.

Subject to all the conditions of this ordinance, permission and authority hereby are granted to the licensee to operate taxicabs in the city for the term ending December 31, 1956, unless sooner terminated as hereinafter provided.

Nothing in this ordinance shall be construed as an exclusive grant to licensee for the operation of taxicabs in the city or to limit the power of the council to license and regulate public passenger vehicles and their chauffeurs or drivers, to fix just and reasonable rates of fare and other charges for any taxicab service and to pass all police ordinances affecting taxicab licenses and operations which may be deemed necessary for public convenience, public safety and the protection of public health and morals.

[4-304-030] 4-348-030 Laws and ordinances applicable—Number of licenses designated.

Licensee shall be subject to all laws and ordinances relating to the operation of motor vehicles and the regulation of traffic, and all ordinances relating to public passenger vehicles affecting taxicabs, not inconsistent with the provisions of this ordinance, and all rules and regulations of the commissioner relating thereto; provided that not more than 3,761 taxicab licenses shall be issued unless, after a public hearing, the commissioner shall report to the council that public convenience and necessity require additional taxicab service and shall recommend the number of taxicab licenses which may be issued. Notice of such hearing stating the time and place thereof shall be published in the official newspaper of the city at least 20 days prior to the hearing and by mailing a copy thereof to licensee. At such hearing licensee, in person or by attorney, shall have the right to cross-examine witnesses and to introduce evidence pertinent to the subject. At any time and place fixed for such hearing it may be adjourned to another time and place without further notice.

[4-304-040] 4-348-040 Additional taxicab service—Considerations.

In determining whether public convenience and necessity require additional taxicab service due consideration shall be given to the following:

1. The public demand for taxicab service;
2. The effect of an increase in the number of taxicabs on

the safety of existing vehicular and pedestrian traffic;

3. The effect of increased competition:

(a) On revenues of taxicab operators;

(b) On cost of rendering taxicab service, including provisions for proper reserves and a fair return on investment in property devoted to such service;

(c) On the wages or compensation, hours and conditions of service of taxicab chauffeurs;

4. The effect of a reduction, if any, in the level of net revenues to taxicab operators on reasonable rates of fare for taxicab service;

5. Any other facts which the commissioner may deem relevant.

If the commissioner shall report that public convenience and necessity require additional taxicab service, the council, by ordinance, may fix the maximum number of taxicab licenses to be issued, not to exceed the number recommended by the commissioner.

[4-304-050] 4-344-050 License-Issuance conditions.

The number of taxicab licenses authorized by the council may be issued or reissued by the commissioner, subject to the provisions of the general ordinances of the city then in effect; provided that the commissioner shall divide all licensees into the following groups according to the total number of taxicabs in actual operation on the effective date of this ordinance:

1. Licensees operating only one taxicab;

2. Licensees operating more than one and not more than 10 taxicabs;

3. Licensees operating more than 10 and not more than 30 taxicabs;

4. Licensees operating more than 30 and not more than 60 taxicabs;

5. Licensees operating more than 60 taxicabs. The commissioner shall issue taxicab licenses in addition to the number authorized by this ordinance whenever 100 additional taxicab licenses or any multiple thereof are authorized by the council, subject to the provisions of Section 4-304-030. The commissioner shall issue such licenses to each group as nearly as practical in accordance with the ratio of taxicabs operated by that group to the total number of taxicabs in actual operation on the effective date of this ordinance; provided that the ratio of taxicab licenses held by the group operating only one taxicab on the effective date of this ordinance shall be maintained during the term of this ordinance by restoring to that group the number of licenses of that group which are revoked or surrendered after the effective date of this ordinance.

All available licenses for the group operating only one taxicab shall be granted to qualified applicants for operation of only one taxicab in numerical order of the filing of their applications after March 1, 1952, and of the number of available licenses for each group operating more than one taxicab, one license shall be granted in rotation to each licensee applying

therefor, beginning with the licensee in that group operating the least number of taxicabs, until all the available licenses for that group have been issued, and if there are more licenses available for any group than applications therefor, the available licenses for that group shall be added to the number available for other licensees in the same ratio and order of issue. Application by licensee for additional licenses shall not be received after 30 days' written notice to the licensee of the commissioner's intention to issue a specified number of available licenses, until all such licenses have been issued.

[4-304-060] 4-344-060 License-Fee.

Licensee shall pay to the city quarter-annually in advance the sum of \$15.00 dollars as compensation for the privileges granted by this ordinance. Such payment shall be made on the first day of January, March, July and October excepting that, in the year 1952, licensee shall pay the first quarterly installment at the time of acceptance of this ordinance. Said compensation shall be in addition to the taxicab license and taximeter inspection fee provided by city ordinances. Nothing in this section shall affect the right of the city to impose or collect a vehicle tax and a tax upon the occupation of cabmen as authorized by the laws of the state of Illinois in addition to the compensation herein provided.

[4-304-070] 4-344-070 Operating conditions.

During the term of this ordinance all of licensees taxicabs shall be maintained in operating condition, satisfactory to the commissioner, for safe, clean and comfortable city-wide service.

Every taxicab shall be operated regularly to the extent reasonably necessary vehicles used by wholesale itinerant food dealers for the carrying or transportation of foods shall be so constructed that the portions of same which contain the food shall be covered so that no dust or dirt will settle on the food. Such portions of the vehicle shall be kept in clean and sanitary conditions, and shall be protected from dust, flies, rodents, other contamination and unsafe temperatures.

[4-304-080] 4-344-080 Statements required-Recordkeeping.

Licensee shall file with the commissioner semiannually before March and September verified statements in detail of all of licensee's assets and liabilities and the revenues and expenses from taxicab operations for the preceding six months ending December 31st and June 30th, respectively. Upon request of the commissioner or of any committee of the city council authorized to investigate or conduct hearings relating to the subject matter, licensee shall furnish such other information as may be required.

Licensee shall keep in the city complete and accurate books and records of all property, operations, receipts and disbursements in such form and detail as may be prescribed by the commissioner. The commissioner, or the authorized committee of

the council, shall have access to the plant, equipment and other property and the inventories, books, papers, accounts and records of all property and operations of the licensee at all reasonable times, for information as to the character and quality of licensee's service, the adequacy of the number of licensed taxicabs in the city to meet the demand for service and whether the established or any proposed rates of fare and other charges for taxicab services are just and reasonable.

[4-304-090] 4-344-090 Bond and insurance requirements.

Notwithstanding the requirements of any law or ordinance for the filing of bonds and policies of insurance against liability for injury to or death of any person or for damage to property by any person operating any public passenger vehicle, licensee agrees to carry public liability and property damage insurance or give surety bond to secure payment of any loss or damage resulting from any occurrence arising out of or caused by the operation or use of any of the licensee's public passenger vehicles, covering each vehicle for the sum of at least \$5,000.00 for property damage, \$50,000.00 for injuries to or death of any one person and \$100,000.00 for injuries to or death of more than one person in any one accident. The council, by general ordinance, may prescribe the qualifications of insurers or sureties and the conditions of the bonds or policies of insurance and the time, place and manner of filing the same, and may provide ways and means for the enforcement of any provision affecting such insurance or security.

[4-304-100] 4-344-100 City address required.

Licensee shall file with the commissioner an address in the city to which all notices required to be given to licensee under this ordinance may be addressed. All such notices shall be deemed good and sufficient for all purposes when deposited in the United States mail properly addressed with first-class postage prepaid.

[4-304-110] 4-344-110 Termination of privileges for default.

If the licensee shall make default in the observance or performance of any one or more of the agreements, conditions or obligations imposed by this ordinance and if such default shall continue for a period of 10 days after written notice thereof to the licensee, the commissioner shall report the facts to the council and in addition to all other rights and remedies of the city in such case the council, by ordinance, may terminate all the rights and privileges hereby granted to licensee and thereupon the commissioner shall revoke all taxicab licenses held by licensee.

[4-304-120] 4-344-120 Invalidity and termination.

(b) A sworn quarterly report shall thereafter be filed by said retail tobacco dealer with the city comptroller, on forms prescribed by him, showing all purchases of cigarettes during the preceding three months, setting forth the same data and information as required in the initial report provided for in subsection (a) of this section. [4-316-430] 4-64-430 Alternate methods of collection.

(a) Notwithstanding the provisions of Sections 4-316-360(b) and (d), and 4-316-380 of this chapter, the city comptroller may provide by regulation that the tax imposed by this chapter shall, in the alternative, be collected by means of the issuance and sale of a single tax stamp to be prepared jointly with either or

both the department of revenue and the state of Illinois and the treasurer of Cook County, evidencing the payment of the tax imposed by this chapter. Toward that end, the city comptroller may make such arrangements and agreements with the department of revenue of the state of Illinois and the treasurer of Cook County as may be required with respect to the method of acquiring, affixing, cancelling and the manner of sharing the cost of such joint single tax stamps, and may establish procedures for payment of that portion of the tax revenue collected by or for the department of revenue and the treasurer of Cook County due and payable to the city of Chicago, in furtherance of the purposes of this chapter. In the event such alternative method as herein provided is utilized, no other method of collecting said tax may be used; however, all other applicable provisions of this chapter shall nevertheless remain in full force and effect.

(b) Notwithstanding the provisions of Sections 4-316-360(b) and (d), 4-316-380(a) and subsection (a) of this section, the city comptroller may provide by regulation that the tax imposed by this chapter, in the alternative, shall be collected by means of the filing of a sworn tax return to be prepared and filed by every wholesale tobacco dealer who sells cigarettes for consumption in the city of Chicago. Said return shall be filed on a monthly basis and shall contain the same information required by Section 4-316-410(b) of this chapter. Said return shall be filed with the city comptroller on or before the first day of each month stating such other and further information as may be required by the city comptroller, and said return shall be accompanied by a certified check in the amount of the tax due and payable upon such taxable sales made by said wholesale tobacco dealer in the city of Chicago during the preceding month. In the event such alternative method is utilized, no other method of collecting said tax may be used; however, all other applicable provisions of this chapter shall remain in full force and effect with the exception of the necessity of filing a quarterly tax return as provided in subsection (b) of Section 4-316-410 of this chapter, which shall not be required.

[4-316-440] 4-64-440 Mutilation of stamps prohibited.

It is unlawful for any person to mutilate a tax stamp herein required on any package of cigarettes before it is sold by a retail tobacco dealer.

[4-316-450] 4-64-450 Failure to pay tax.

(a) Whenever any person shall fail to pay any tax as herein provided, the corporation counsel shall, upon the request of the city comptroller, bring or cause to be brought an action to enforce the payment of said tax on behalf of the city in any court of competent jurisdiction.

(b) If the mayor, after hearing held by or for him, shall find that any person has wilfully evaded payment of the tax imposed by this chapter, he may suspend or revoke all city licenses held by such tax evader. Said person shall have an

opportunity to be heard at such hearing to be held not less than five days after notice of the time and place of the hearing to be held addressed to him at his last known place of business. Pending notice, hearing and finding, any tobacco dealer's license possessed by said person shall be temporarily suspended. Any suspension or revocation of any license shall not release or discharge said person from his civil liability for the payment of the tax, nor from prosecution for such offense.

[4-316-460] 4-64-460 Confiscation of illegal cigarettes.

Whenever the city comptroller or any of his duly authorized representatives shall discover any cigarettes subject to any tax provided by this chapter upon which said tax has not been paid or the stamps affixed and cancelled as herein required, they are hereby authorized and empowered forthwith to seize and take possession of such cigarettes together with any vending machine or receptacle in which they are held for sale which, except for money contained in such vending machine or receptacle, shall thereupon be deemed to be forfeited to the city. The city comptroller may, within a reasonable time thereafter, by a public notice given at least five days before the day of sale, sell such forfeited cigarettes and vending machines or receptacles at public sale and pay the proceeds into the treasury of the city of Chicago. In the alternative, the city comptroller, on reasonable notice, may permit the person from whom said cigarettes were seized, to redeem the same and any vending machine or receptacle seized therewith, by the payment of the tax due together with a penalty of 50 percent thereof and the cost incurred in such proceeding, provided, however, that such seizure and sale or redemption shall not be deemed to relieve any person from fine or imprisonment provided herein for violation of any provision of this chapter.

[4-316-470] 4-64-470 Proceeds to be paid into city treasurer.

All proceeds resulting from the imposition of the tax under this chapter, including penalties, shall be paid into the treasury of the city of Chicago and shall be credited to and deposited in the corporate fund of the city.

Repeated offenses in excess of three within any 180-day

period may also be punishable as a misdemeanor by incarceration in the county jail for a term not to exceed six months under the procedure set forth in Section 1-2-1.1 of the Illinois Municipal Code (Illinois Revised Statutes 1969, Chapter 24, paragraph 1-2-1.1) and under the provisions of the Illinois Code of Criminal Procedure (Illinois Revised Statutes 1969, Chapter 38, paragraphs 100-1, et seq.) in a separate proceeding. A separate and distinct offense shall be regarded as committed each day upon which said person shall continue any such violation, or permit any such violation to exist after notification thereof.

[4-316-490] 4-64-490 Saving clause.

If any provision of this chapter, or the application thereof to any person or circumstances, is held invalid, the remainder of this chapter and the application of such provisions to other persons or circumstances shall not be affected thereby.

Any person owning a scale or scales suitable for weighing as aforesaid who desires to be licensed as a public weighmaster, shall file an application in writing therefor which shall conform with the general requirements of this code relating to applications for licenses. In addition said application shall set forth the location of the place of business for which such license is requested, and shall state the names of the officers of the corporation or persons in a partnership who will be authorized to weigh commodities. Such application shall contain, plainly printed thereon, the following form of agreement, which shall be subscribed by the applicant before any license shall be issued thereunder:

The applicant hereby agrees and consents, as a condition for the issuance of a license hereunder, that in case the applicant as a public weighmaster weighs any load lot of any commodity, produce, article or articles of merchandise sold in load lots by weight, sold or delivered by the applicant or any person directly or indirectly interested with the applicant in the operation of the public scale of the applicant, the inspector of weights and measures of the city or any of his deputies acting under his orders, or the purchaser or consignee, shall have the right to reweigh or cause to be reweighed, as provided in Section 4-8-380 of this code, any such load lot of commodity, produce, article or articles of merchandise. This condition is accepted by the applicant with the understanding that the same shall, upon the issuance of a license hereunder, at once become binding on him.

[4-336-040] 4-368-040 Bond.

Such applicant shall also execute and present with his application a bond in favor of the city in the sum of \$2,000.00 with good and sufficient surety conditioned for the faithful performance of such applicant's duties as a public weighmaster and for the payment by such public weighmaster of any fine which may be

imposed upon him for any violation of said applicant's duties as such public weighmaster. Said bond shall be subject to the approval of the city comptroller and shall be filed in the office of the comptroller.

Each such deputy weighmaster, or the public weighmaster appointing him, shall pay to the director of revenue the sum of \$30.00 as an annual license fee for such deputy weighmaster. Each public weighmaster appointing any deputy weighmaster shall be answerable for all acts of such deputy weighmaster in connection with the weighing of any commodity over the scale or scales of such weighmaster; provided, that such responsibility on the part of the public weighmaster shall not relieve the deputy weighmaster of liability for his own acts.

Any public weighmaster shall have the right, at any time after the appointment of a deputy by him, to cancel such appointment, and, upon canceling such appointment, it shall be the duty of such public weighmaster to notify immediately the inspector of weights and measures that the appointment of such deputy has been cancelled, and thereupon such deputy shall cease to have any authority to weigh any commodity on the scales of such weighmaster.

Public weighmasters or deputy weighmasters shall, by virtue of their licenses, be entitled to weigh only on the scale or scales designated in any such license. Every public weighmaster acquiring a new scale after the issuance of his public weighmaster's license and desiring to weigh on such scale, shall notify the city clerk of the location of such additional scale, and thereupon such new location shall be entered by the city clerk on the original application for public weighmaster, and the inspector of weights and measures shall be notified by the city clerk of such additional scale. If any public weighmaster changes the location of any scale, he shall immediately notify the inspector of weights and measures and secure a transfer of such license for such new location, which transfer shall be issued for the regular transfer fee and without further bond or license fee; provided, however, that any public weighmaster shall have the right, at any time after the appointment of a deputy weighmaster by him, to assign such deputy to weigh on any scale or scales owned by him, the location of which is set forth in his license application or his supplementary license application.

[4-336-120] 4-368-120 Attendance at scales.

Each public weighmaster shall be present at his scale, either in person or by deputy, at all reasonable times during each day, except Sundays and public holidays; provided, however, that if requested so to do upon any day preceding any such Sunday or public holiday, the public weighmaster shall be present or cause a deputy weighmaster to be present at said scale on the succeeding Sunday or public holiday.

[4-336-130] 4-368-130 Weighing charges.

Public weighmasters, when not the owners or sellers of the

articles, commodities or produce weighed by them, shall be entitled to charge and receive a sum not in excess of \$.25 for each and every load or part of load, or lesser quantity when not contained in any wagon, truck or other vehicle, of any commodity, produce or article of merchandise weighed by them on the scales of such public weighmasters; provided, however, that if a person request the weighmaster to be present at his scales on any Sunday or legal holiday, such person shall be required to deposit with such public weighmaster the sum of \$10.00, which sum shall be the minimum reimbursement to such weighmaster for his services in weighing commodities on his scale on any Sunday or legal holiday.

[4-336-140] 4-368-140 Weight certificates-Contents.

Each public weighmaster shall issue a weight certificate, signed by him or his deputy, under his official seal, which certificate shall legibly state thereon the following: the commodity, produce or article weighed; the date and time of weighing, both the gross and tare; the name of the weighmaster or deputy weighmaster who did the weighing; the name and address of the person for whom the weighing was done; the name of the driver of the vehicle bringing such commodity, produce or article to the scales, or, if the same is not contained in a vehicle, the name and address of the person bringing the same to the scales; where contained in a vehicle, the kind of vehicle and the name and address of the purchaser or consignee of the commodity weighed; when the commodity is loaded in a vehicle, the total or gross weight of the commodity weighed and the conveyance in which it is loaded, together with the driver and any other person who may be on the vehicle when weighed, and of the horses, if a horse-drawn vehicle and the horses are weighed; the tare weight or the weight of the vehicle, including the driver and any other person who may have been on the vehicle when weighed while loading and including the horses if they were weighed when the loaded vehicle was weighed; the net weight of the commodity, produce or article contained in such vehicle, or the net weight of the commodity, produce or article when not contained in a vehicle at the time of weighing.

In no case shall any public weighmaster state in his certificate the tare weight of any vehicle until after he shall have weighed the vehicle in such manner as to secure the weight as specified herein; provided, however, that in the case of a divided load, by which is meant a load containing more than one order for the same or different purchasers or consignees, no penalty shall be imposed under this chapter by reason of the fact that the tare weight shown on the weight certificates is only the original tare weight of the vehicle and equipment before loading, if in such case each order has been weighed separately and the net weight of each separate order or delivery is correctly shown on the weight certificate and such correct net weight is delivered.

Any public weighmaster or any deputy public weighmaster who shall issue to any person a certificate of weight giving a false weight of any article or commodity weighed by him or which does not

contain or correctly state therein the information required by this code, shall be fined not less than \$25.00 nor more than \$200.00 for each offense; and upon conviction hereunder, the mayor, in his discretion, may revoke the license of such weighmaster or deputy weighmaster, and may thereafter, in his discretion, refuse to issue a license to such weighmaster or deputy weighmaster in the same or succeeding year. Each public and deputy weighmaster shall procure a seal at his own expense, which seal shall be round in form not to exceed one and one-quarter inches in diameter, of a type similar to a notary public's seal. The seal of a public weighmaster shall show his name around the upper half of the die and his title around the lower half of the die. The seal of a deputy public weighmaster shall have the name of the weighmaster who appointed him around the upper half of the die, with his own name across the center of the die and his title around the lower half of the die. Such seal shall be stamped over the weights set forth therein upon each certificate issued by such public or deputy weighmaster.

[4-336-170] 4-368-170 Restrictions on deputies.

No deputy weighmaster shall use his seal on any weight certificate other than the one of the public weighmaster by whom he has been appointed, nor shall he be authorized to weigh or issue certificates for any weighing done on any scale other than those the locations of which appear on the license application of the public weighmaster appointing him or such additional ones as may be installed after the application has been made; provided, however, that in case of an emergency caused by the breaking down or getting out of order of the scale of the public weighmaster, he shall, pending the repairing and resealing of such scale, be authorized to weigh on another different scale upon the assumption of responsibility by the public weighmaster appointing him for the accuracy of the scale so used.

(a) It shall be the duty of every owner to permit a representative of the department of health, after proper identification, to enter at any reasonable time and make inspections of the facilities, equipment and vehicles for determining compliance with the requirements of this Municipal Code relating to health and sanitation and, when required to do so, the owner shall furnish samples of any foods prepared, kept, sold or transported by any such food establishment as often as the commissioner of health may deem necessary to determine that the foods are free from adulteration, not misbranded, do not contain an excessive number of microorganisms or their toxins, and otherwise comply with the provisions of this Municipal Code and the rules and regulations of the board of health. The owner shall answer all reasonable and proper questions and permit the health authority to examine records of the establishment to obtain pertinent information relating to food, water, beverages and supplies received or used and persons employed. Any samples provided shall be examined or analyzed under the direction of the department of health, and a record of each such examination or analysis shall be made and kept in the offices of the department.

Upon failure or refusal by an owner to permit inspection or to furnish required samples, the commissioner shall immediately suspend any and all licenses or permits issued to the owner of that particular food establishment.

2. It shall be unlawful for any person to remove the "Held for Inspection" tag or seal placed on the food by the department of health, nor shall the containers of such food be removed from the premises or destroyed without permission of the department of health except on order of a court of competent jurisdiction. The department may vacate a "Held for Inspection" order or may by written order direct the owner or person in charge of the food to denature or destroy such food, bring it in compliance with the provisions of this chapter and the rules and regulations of the board of health or dispose of it for nonhuman use as may be approved by the department of health. Any order of the department of health to denature or destroy food shall be stayed pending appeal if the order is appealed to a court of competent jurisdiction within three days. Nothing in this section shall preclude any court action based upon a finding of unwholesome or adulterated foods.

(c) 1. It shall be the duty of any owner who has knowledge of, and of any physician who attends or prescribes for, and of every superintendent or person in charge of any hospital caring for any person suffering from or suspected of suffering from food poisoning or infection or any form of such poisoning or infection, whether bacterial or chemical, at once to report this fact to the department of health and thereafter to submit to the department of health a written report stating the name and address of the person thus afflicted, the nature of the poisoning or infection and the source or probable source of the same.

2. No person affected with or carrying any disease in a communicable form, or affected with boils, infected wounds, sores, acute respiratory infection or intestinal disorder shall work in any area of a food establishment in any capacity in which there is a likelihood of that person contaminating food or food-contact surfaces with pathogenic organisms or transmitting disease to other persons. When suspicion arises as to the probability of transmission of infection from any food establishment employee, the department of health may: require the employee to submit urine or feces or other necessary specimens for laboratory examination or other medical examination to determine the presence of disease; exclude the employee immediately from all food establishments; close the food establishment until the department determines that no danger of disease outbreak exists; make such medical examinations of the employee and his associates, including laboratory examinations, as may be deemed necessary under the circumstances.

The department of health shall inspect wholesale itinerant food dealers whenever the existence of unsanitary food handling conditions are apparent and as often as necessary to determine that all requirements of this code are being complied with. The health authority making inspection or a wholesale itinerant food dealer shall file a report in the records of the department of health. The department of health shall inspect mobile food dispenser vehicles serving ice cream, milk or other frozen desserts at least once every 90 days during the period from April 1st through October 1st of every year.

(b) Whenever the health authority inspects an establishment, he shall record the findings of the inspection on a report form provided by the department of health for this purpose. Such reports shall be signed by both the inspector and the establishment's representative, and one copy of the report shall be left with the management of the establishment and shall be posted by the health authority upon an inside wall of the establishment accessible to the public. It shall be unlawful for any person except an authorized agent of the department of health to deface or remove any such posted report, and a violation of this provision may result in suspension of any and all licenses.

(c) When the department of health finds a violation of any requirements of this Municipal Code relating to health and sanitation, it may make a second inspection after a lapse of whatever time it deems necessary for the correction of the violations; however, whenever an inspection indicates that the conditions in the food establishment create an imminent hazard to the public health, the license may be immediately suspended. If, upon second inspection, it is found that the establishment is in continued violation of this code, the license and permits of the food establishment may be temporarily suspended by the department of health. Upon suspension thereof, all operations shall cease at once, and the license and permits shall be removed from the establishment and delivered to the department of health. The health authorities shall promptly notify the Chicago Police Department of the suspension, and the police department shall enforce the cessation of operations.

(d) 1. After the owner receives a notice of violation from the department of health, as evidenced by the inspection report, but before the allotted time has elapsed for compliance, the owner may request a hearing at the offices of the department of health to file exceptions to and contest the findings of the inspection report or he may request the commissioner to extend the time allowed for compliance. In any case, the request must be filed

within 24 hours of receipt of notice of violation. A hearing to contest the findings of the inspection report shall be conducted by a person other than the person who conducted the inspection or his subordinates.

2. An owner whose request for a hearing has resulted in determination by a hearing officer to sustain the findings of an inspection report or whose request to extend the time for compliance has been denied may, within 24 hours of the determination or denial, request a reconsideration, but unless the inspector's findings are overruled by the hearing officer or the time extension granted by the commissioner, the owner remains under a duty to correct the violations within the time allotted in the notice of violation.

3. A license holder whose license has been suspended may at any time apply for restoration of the license. Within 24 hours after the department of health receives such application, accompanied by a statement signed by the licensee that the provisions previously violated have been complied with, the department of health shall reinspect the establishment to assure that the applicant is complying with the requirements of this code. When the reinspection indicates full compliance, the license shall be restored and the Chicago Police Department so notified.

4. Upon a record of repeated violations of this Municipal Code or the rules and regulations of the board of health related to health and sanitation, or repeated suspensions of license, the commissioner may recommend the revocation of the license to the mayor's license commission in accordance with the requirements of Chapter 4-4 of the Municipal Code.

The can or other bulk milk container shall be filled only at the milk plant and shall be sealed in such manner as to make it impractical to withdraw any part of its contents or to introduce any substance without breaking the seal or seals. The delivery tube and any milk-contact parts of the dispensing device shall be attached at the milk plant, and shall be protected by a moistureproof covering, or housed in a compartment with a moisturetight closure which shall not be removed until after the container is placed in the refrigerator compartment of the vending machine.

[4-344-480] 4-8-480 Sanitary requirements--Non-ready perishable food-contact surfaces.

All parts of vending machines which come into direct contact with other than readily perishable food shall be thoroughly cleaned by approved methods. The frequency of such cleaning shall be established by the department of health based upon the type of product being dispensed. A record of such cleaning operations shall be maintained by the operator in each machine and shall be made available at the time of inspection and shall be current for at least the past 30 days.

The immediate area in which the machine is located shall be well-lighted. Each vending machine shall be so located that the space around and under the machine can be easily cleaned and maintained, and so that insect and rodent harborage is not created. The board of health shall publish such regulations as are necessary to ensure the sanitary maintenance of the vending machine area.

[4-344-510] 4-8-510 Vending machine construction, design and maintenance.

The vending machine shall be of sturdy construction and the exterior shall be so designed, fabricated, finished and maintained so as to facilitate its being kept clean, and to minimize the entrance of insects and rodents. located within the machine. Suitable racks or case shall be provided for multi-use containers or bottles.

Containers shall be provided within all machines dispensing liquid food in bulk for the collection of drip, spillage, overflow or other internal wastes. An automatic shutoff device shall be provided which will place the vending machine out of operation before such container overflows. Containers or surfaces on which such wastes may accumulate shall be readily removable for cleaning, shall be easily cleanable, and shall be corrosion-resistant. If liquid wastes from drip, spillage or overflow which originate within the machine are discharged into a sewage it shall be accomplished by indirect or broken connection to a sewer and be effectively protected from insect and vermin infestation.

[4-344-540] 4-8-540 Refrigeration requirements.

Prior to being loaded in the delivery vehicle and during transit, potentially hazardous food shall be maintained at a temperature of 45 degrees Fahrenheit or below, or 140 degrees Fahrenheit or above, whichever is applicable to the type of food. Chapter [4-348] 4-2 CARE OF FOODS

[4-348-010] 4-9-010 Protection of food.

It shall be unlawful for any person to sell, transport, convey or carry from one place to another any food within the city unless such food is protected from contamination.

All foods shall be protected from contamination; however, foods which are customarily subject to further processing such as cooking, peeling or shelling after sale and before consumption may be displayed in bulk, but those which are customarily consumed without further processing may not be displayed for sale in bulk. Examples of foods which may be displayed for sale in bulk include but are not limited to raw vegetables which are usually peeled, shelled or cooked after sale and before consumption; fresh fruit such as oranges, bananas, mangoes and others of the type which are usually peeled before consumption but not including fresh fruit such as apricots, pears, peaches, plums, cherries and grapes which are not usually peeled before consumption; and hams, smoked, dried or pickled meats or fish which are entirely enclosed in a protective covering or casing.

The protection which shall be considered adequate for food kept in rooms of buildings which are free from flies shall be an enclosure consisting of a front and top covering extending not less than 12 inches back from such front, which front and top shall be made of glass, wood, sheet metal, or material of a similar character which is impervious to dust, and sides of impervious material or 20-mesh screen or material of a similar character that will protect against promiscuous handling. Like protection shall be used where food is exposed in show windows or upon show stands; except that where food is exposed in such a manner, the front and entire top may be made of 20-mesh screen or material of similar character. The word "front," as used in this section, means the side of a case or container facing toward the part of the store or place to which the general public has access.

The protection which shall be considered adequate for food kept on sidewalks, in doorways, or open windows, on street stands, pushcarts or other places in the open air, or in rooms or buildings which are not free from flies, shall be a complete enclosure of a fixed or permanent character, consisting of glass, wood or sheet metal, or material of a similar character which is impermeable so as to protect against contamination; provided, however, that in the case of fruits, bakery goods or other foods subject to sweating when completely enclosed, openings may be allowed on two sides of the enclosure required, which openings shall not exceed 10 percent of the area of such side, and which openings shall be completely covered with 20-mesh screen or material of a similar character; and provided, further, that covering the top and all sides of a container with paper, cloth, canvas, tarpaulin or material of a similar character shall be considered an adequate cover for food while being conveyed or transported in vehicles.

Fresh cut meats in smaller portions than a quarter of a carcass shall be protected at all seasons of the year, as required above. Carcasses, either halved or quartered, and raw smoked ham and bacon shall be adequately protected from flies from June 1st to October 1st.

The original box, crate or container, and the usual cover for such containers, left in place and intact, shall be considered adequate protection for fruits sold or offered for sale in such original containers.

A complete enclosure in a box, carton, wrapper or package of a similar character shall be considered adequate protection for all food required to be protected.

All food sold outside of buildings, or in a part of a store, restaurant or lunch room to which the public has access, shall be kept at least 18 inches above the floor or sidewalk, unless the food is contained in tight containers or in containers the openings of which are at least 18 inches above the level of the floor or sidewalk.

Nothing in this section shall be construed to prohibit the necessary exposure of food during the immediate processes of preparation, cooling, assortment or packing in a building or place screened and free from insects, or during loading or unloading, or during the actual process of servicing or selling.

[4-348-020] 4-9-020 Definitions.

If the department of inspectional services, upon investigation, shall find that the place where such slaughtering is to be carried on is in a good sanitary condition and the slaughtering can be conducted without causing a nuisance, it may issue a permit to carry on such slaughtering for a period of not exceeding one day at the place mentioned in said application.

Adequate underground connections shall be made from every such building with a public sewer, and the floor of any building on which slaughtering is done and any yard connected therewith shall be cemented and paved with brick or other suitable material so as not to absorb blood and so as to carry all liquids into the sewers.

[4-388-100] 4-52-100 Hours for slaughtering.

No owner or person in possession, charge or control of a slaughter house shall slaughter animals for food between the hours of 7:00 p.m. and 7:00 a.m. or on Sundays, without first notifying the department of inspectional services.

The keeping and slaughtering of livestock, the preparation and keeping of all meat, birds and fowls, the rendering of all animal matter, and the manufacture of glue and all byproducts from animal matter, shall be conducted in the manner which is, or is generally reputed or known to be, the best adapted to secure and continue their safety and wholesomeness as food, and to avoid all offensiveness of such keeping, slaughtering, rendering and manufacturing. Blood from slaughtered animals shall not be allowed to flow into any sewer or into the Chicago River or any of its branches, but while still fresh shall be treated so as not to become offensive.

All offensive odors arising from the handling of meat or other animal matter, melting or rendering, and the treating of and caring for offal, blood or any other material stored or manufactured, shall be destroyed by combustion, condensation or other means equally effective, and according to the best and most approved means and processes, and shall not be allowed to escape into the outside air.

All gases generated in the process of boiling shall be carried to and entered into the bottom of and under the body of water contained by said condenser. Such gases as are not condensed in the water shall be carried through another pipe connected with the top of the condenser, to the boilers or other places where heat of not less than 600 degrees Fahrenheit is maintained, and shall there pass through such fire and be consumed. While the condenser is in use, it shall be obligatory on the part of the user to allow sufficient water to flow through the condenser to maintain a temperature not higher than 100 degrees Fahrenheit.

A condenser of the spray, jet or other suitable pattern shall be connected with all dryers, and a fan or pump shall draw the vapors from the dryer and force them through such condenser, the water from which shall pass into the sewer, and a sufficient quantity of water shall be used to condense thoroughly any and all vapors and odors conveyed thereto.

To the end that a proper inspection may be readily made by the authorities of the temperature maintained in such condensers, there shall be attached to each of such condensers an automatic or self-registering thermometer of such a character as will automatically keep a daily record of the temperature maintained in each such condenser at all times during the use thereof.

[4-388-130] 4-52-130 Offensive gases and odors prohibited.

No person shall boil any offal, swill or bones, nor any fat, tallow or lard, except while the same is fresh and otherwise inoffensive, nor shall the business of bone crushing, bone boiling, bone grinding, bone burning, shell burning or gut cleaning, nor the skinning of or making of glue from any dead animal or part thereof, nor the storage or keeping of scrap, fat or grease or offensive animal matter be permitted or conducted at any place within the limits of the city, or within one mile thereof, in such a manner as to generate any offensive or deleterious gas, vapor, deposit or exhalation that is dangerous or detrimental to life or health.

It shall constitute, and it is hereby declared, a nuisance for any person so to steam or boil or in any way render any offal or tainted or damaged lard or tallow, or so to steam or render any animal substances, as to occasion any offensive smell, or to steam or boil or render any substance which by undergoing such process so taints the air as to render it unwholesome or offensive to the smell or detrimental to health, within the limits of the city, or within a distance of one mile therefrom.

Every person engaged in the business of boiling or rendering of fat, lard or animal matter shall cause the scrap or residuum to be so dried or otherwise prepared as effectually to deprive such material of all offensive odors, and to preserve the same entirely inoffensive immediately after the removal from the receptacles in which the rendering process may be conducted.

[4-388-140] 4-52-140 Diseased cattle.

No person shall kill or cause to be killed anywhere in the city any cattle for human food while such cattle are in an overheated, feverish or diseased condition, and the owner, keeper or person in control of any cattle which are diseased in the city shall at once inform the department of inspectional services of the fact that such cattle are diseased and of the place where they are kept immediately upon such cattle becoming diseased or upon being brought into the city in a diseased condition.

[4-388-170] 4-52-170 Sleeping on premises prohibited.

No person shall use for the housing, sheltering and harboring of its employees or other persons any packing or slaughterhouse or any place which is occupied for the purpose of slaughtering or rendering cattle, sheep or hogs, or of dressing, cleaning, treating or preparing for shipment or canning meats and other foodstuffs by hand or machinery, or cause or permit same to be used as sleeping quarters or living apartments by such employees or other persons. Any such house or place so used or occupied for sleeping or living purposes is hereby declared to be a nuisance.

Whenever any such nuisance shall be found upon any premises within the city, the department of inspectional services is hereby authorized and directed to cause the same to be summarily abated in such manner as it may direct.

For the purpose of carrying the foregoing provisions into effect, it shall be the duty of the department of inspectional services to cause to be detailed a sufficient number of police immediately upon complaint of any citizen. These police shall make a thorough and systematic examination of any such plant or plants and building or buildings and ascertain and report any such violations of this section, and for this purpose investigators shall be permitted at all times to visit or enter upon any building, lot or ground within the city limits and make examination thereof.

[4-388-180] 4-52-180 Inspection.

The department of inspectional services, or any of its authorized employees, shall be permitted entrance at all hours of the day or night to all buildings used for the purposes specified in this chapter, and shall further be permitted to make free and unrestrained examination of all apparatus or utensils used in such manufacture, or in the disposition of gases generated in such manufacture, and all matters and things relating to the health of the community.

[4-388-190] 4-52-190 License-Revocation conditions.

Any license granted under the provisions of this chapter may be revoked upon written notice by the mayor whenever it shall appear that the parties so licensed have violated any provisions of this code or any law of the state relating to said business of slaughtering, packing, rendering and manufacture of fertilizer, glue or other byproducts of animal matter.

[4-388-200] 4-52-200 Abatement of nuisance.

In all cases where a nuisance shall be found in any building or upon any ground or other premises used for the slaughtering or

rendering or for the conduct or operation of any business mentioned in this chapter, 24 hours' notice shall be given in writing, signed by the commissioner of the department of inspectional services, to the owner or occupant of such building or other premises, where he is known and can be found, to remove such nuisance. In case of his neglect or refusal to abate the same, in accordance with such notice, the commissioner of the department of inspectional services is hereby authorized in his discretion to cause the same to be summarily abated in such manner as he may direct, and such person shall be chargeable with the expenses which may be incurred in the abatement or removal of such nuisance, to be collected by suit or otherwise, in addition to the fine and penalty provided for.

2. All applicable official reviews, approvals or permits are required to be obtained by the applicant or its successors, assignees, or grantees.
3. The requirements, obligations and conditions contained within this planned development shall be binding upon the successors and assignees of the Applicant and the Property owners of record title. Furthermore, pursuant to the requirements of Section 11.11-1 of the Chicago Zoning Ordinance, the Property and all portions thereof shall throughout the period this Planned Development is in effect, be held under single ownership or under single designated control. Nothing herein shall be construed to mean that any owner of the Property or any portion thereof is relieved of any obligation hereunder or any rights in relation thereto, or may not receive directly such communications or is not subject to City action pursuant to this Planned Development. Nothing herein shall, however, prohibit or in any way restrict the alienation, sale, or any other transfer of all or any portion of the Property or any rights therein.
